

Vahid Rzayev, who had not told anything about the Great Creator's Sayings to anybody during long years, disclosed it for the first time to his brother Fikrat Rzayev by Permission of the Great Creator in 1997. Just Fikrat Rzayev initiated publication of the Great Creator's Sayings in a book form ("Creation") in 1999, and this made the Sayings sent by the Great Creator for all mankind, accessible for broad masses. Other books published afterwards contain answers to our questions about creation, purity, and theology as well.

All written in the books by Vahid Rzayev, as he said, are "Postulates". The books contain information about the Great Creator and His Saints (Angels), structure and motions of the Universe, of suns and planets, as well as of the Earth, initial and further periods of creation of the Universe and mankind, the meaning and essence of individuals' coming to the world and of their return, life standards of behavior and many other issues. This book, introduced to English-speaking readers, cover some part of that information.

Rzayev Vahid Zeynal (1947-2018) was born in officer's family in Nakhchivan city. His works published after publication of the BOOK "CREATION" (May, 1999) containing the GREAT CREA-TOR'S SAYINGS (in azerbaijani cyrillic alphabet).

**“Postulate”**

**Baku - 2020**

Vahid Rzayev, who had not told anything about the Great Creator’s Sayings to anybody during long years, disclosed it for the first time to his brother Fikrat Rzayev by Permission of the Great Creator in 1997. Just Fikrat Rzayev initiated publication of the Great Creator’s Sayings in a book form (“Creation”) in 1999, and this made the Sayings sent by the Great Creator for all mankind, accessible for broad masses. Other books published afterwards contain answers to our questions about creation, purity, and theology as well.

All written in the books by Vahid Rzayev, as he said, are **“Postulates”**. The books contain information about the Great Creator and His Saints (Angels), structure and motions of the Universe, of suns and planets, as well as of the Earth, initial and further periods of creation of the Universe and mankind, the meaning and essence of individuals’ coming to the world and of their return, life standards of behavior and many other issues. This book, introduced to English-speaking readers, cover some part of that information.

---

## **Preface to the Book Entitled “The Talk about Creation. Part I” by Fikrat Rzayev**

The Sacred Book entitled “Creation” (“Yaranish”) sent to mankind on Earth from Mercy and Kindness of the Great Creator was published in Baku in May, 1999.

In this book the Great Creator informed people about Himself and His Saints (Angels), the structure and motions of the Universe, of suns and planets, as well as of the Earth. Initial and further periods of creation of the Universe and mankind, meaning and essence of coming of individuals to the world of living creatures and of their return, life standards of behavior, Sending moments of Sent persons (Prophets) to the Earth and other dwelling planets and many other issues are talked about here.

Though Vahid Rzayev, who wrote Sayings of the Great Creator, gave explanations for some of them, to comprehend it thoroughly reader is required to have a lot of new knowledge that was not known by people by now.

My brother Vahid, who had not told anything about Sayings to anybody during long years, finally, for the first time in June of 1997 disclosed the issue to me by Permission of the Great Creator during my next visit to Nakhchivan, and told that earlier he had written down the Great Creator’s Sayings accompanied by synchronic Demonstrations in two thick copy-books, but had burnt them later.

---

I regretted very much, and noted that the essence of the issue is not creation of a new religion on the Earth, and I requested him and recommended as elder brother to record the Sayings in the future, if they will be, for the sake of Science, for understanding and comprehension of Divinity, for the sake of Humanity, and at least to let his and my children, their future generation read and learn the Writings.

In February-May of 1998 during my next visit to Nakhchivan I saw that Vahid had written the Great Creators new Sayings and I read them gladly. And in the beginning of October of the same year 6 Copybooks had been written already. During my conversations with Vahid I underlined that the Great Creator would not make you write these Writing for a few people, and if the Great creator permits, you should make plan for publishing them as a Book.

In February-March of 1999, when I was in Nakhchivan, I learnt from Vahid that there had not been need in making plan to systematize the Writings containing in 6 Copy-books, that is, On October 24, 1998 from 15.00 p.m. the Great Creator started dictating His above mentioned book "Creati-on". The Writings in this Sacred Book, as told by Vahid himself, were identical to the Sayings that were containing in Vahid's first Copybook burnt by him.

Since May 1998 I have read Vahid's Copybook with Records and from time to time made broad conversations with him within my concernment, for my comprehension.

---

The main object and content of talks in this book presented to readers, even though partially, serves for explanation of the Sayings, for comprehension of Divinity Science. They were recorded in tape by me during our conversations on October 8-16, 1998, and then were compiled as the present book by request of most readers of the Sacred Book “Creation”. I suppose that my explanatory notes given in the text within brackets by italic will help readers to some extent”.

**Fikrat Rzayev**

The text on the first page of that Book:

**With Purity.**

**With Mental Purity,**

**With Spiritual Purity,**

**With Eternal Purity.**

**With Purity.**

– O Great Creator, I worship You and Your Eternal Place.

– O Great Creator, I worship Your Saints in White.

– O Great Creator, I worship Your universes, Your suns,  
Your places, all Your creations that are always under your  
Sight.

– I worship Your Light, Your Creation Particles, Your  
Mercy, and Your Patience.

– O Great Creator, I worship Your Holy Dispatches from  
Prime, from Sanctity and Your sent Books.

– I worship your every human who returns to his Sanctity  
comprehending his Initial Sanctity.

\*

O Great Creator, I am thankful for Your Welfare, Know-  
ledge, Science that You send on the Earth.

\*

**With Purity.      With Light.**

**With Mental Purity,      Wit Mental Light,**

**With Spiritual Purity,      With Spiritual Light,**

**With Eternal Purity.      With Eternal Light.**

**With Purity.                      With Light.**

---

## **My Thoughts about Vahid Rzayev and His Book “We Started Existence from Existent”...**

When I started writing this note I firstly thought that there are not enough words to understand, comprehend Vahid Rzayev and the World of Divinity with Knowledge that he brought again; you should just read the texts that he wrote with great responsibility and very attentively, think and comprehend.

By disposal of fortune I had to live in Nakhchivan during a year in 2009-2010 and I had spent all my spare time, that I had there a lot, for reading different fiction, scientific, philosophicall religious books, and for conducting different researches. Especially, a lot of questions concerning religion remained unanowledged, and I could not find answers for them.

The answers to the main questions that I was seeking for since I started realizing the life I found in early 2011 in MISTER Vahid, whom I met and made acquaintance of through our mutual friend Huseyn Javadov in Baku when I just reached my 60 years of age.

Though we leaved and grew up in the same city, and the workers of Nakhchivan State Standards Committee, where he had worked, used to conduct inspections in different trade departments that I had managed in my youth, somehow we had not met in Nakhchivan ... it's a fact.

In one of our following meetings near the building of ANAS (Azerbaijan National Academy of Sciences) he handed me two small packages and said quietly and “Gently”: “There are our

---

books in it. Can you familiarize? These are two sets, one you may give to anybody you want". I decided to take one of the packages for the time being.

Thus, as those books prepared and published as a result of overall efforts of brothers – Vahid Rzayev and Fikrat Rzayev in 1999-2001 aroused very big interest in me, I familiarized with them in a short time.

Since my first acquaintance with the books I started realizing that all 5 books serve for interpretation of the **Main Book** – **“CREATION”**. On the 2<sup>nd</sup> page of the book there were written by small print the phrases that I had not ever met anywhere: “The Great Creators Sayings were written by: Rzayev Vahid Zeynal”, and in the end there was the following text: **“The Great Creator’s Sayings are neither sold, nor bought – The Great Creator’s Sayings are comprehended. They are not hard for comprehension, your Greatness is not far from you”**.

By the time when I read this texts I had never thought deeply about real meanings of “Creation”, “Purity”, “Sayings”, “Divinity” notions.

Both my familiarization with these books in that period and our conversations during recent 5 years brought me to conclusion that Rzayev Vahid Zeynal is Extremely Ordinary and at the same time Very Great Person, he helps, benefits to people around him, to those who addresses him disinterestedly, and for me this acquaintance and this friendship is also Great Irreplaceable Wealth and Honour.

---

During these past 5 years spent with him we could do a number of important activities, obtained results by the use of his valuable, quiet and relevant advices and recommendations (we published books: about Elman Aliyev; about Aydin Azimbayov; “The Word” monograph and “Word Construc-tion” books by Fikrat Rzayev – we also organized their academic discussions in Nakhchivan; we assisted for world-wide propagation of 7 books about Nasraddin Tusi’s heritage by Ramiz Daniz – in electron and printed formats and etc.).

Though we published the book “Noah’s Ark, Gamigaya-Gobustan Alphabet” by Ajdar Farzali (the book proves that all alpahebets in the world were created in Gamigaya in Nakhchivan region of Azerbaijan and spread everywhere from that place, and confirmation of this fact exists for the time being on the old rock paintings, cultural monuments in our country and in all continents in the world) in 2005 in the Center of Scientific Researches “Kainat” led by Elman Aliyev by our friends’ joint efforts, just V.Rzayev gave real appraisal of the book. Moreover, this idea become the first project submitted to the state by “AqRa” PASAS, and as a result we published the book again in Russian by support of the state and achieved its wide academic discussion and its coverage in different mass media.

We registered “AqRa” Public Association on Support for Advancement of Science that was named by MISTER Vahid and founded the website [www.aqra.az](http://www.aqra.az) that has secured its worthy place on a world scale. For the present time (08.09.2020) 98076 visitors from 133 countries worldwide have

---

read different materials in the website for more than 266 thousand times. It is joyous that more than 68 thousand of them are from Azerbaijan. At the same time more than 14000 readers are from the USA and other English speaking countries, and it is very thoughtful, at least because almost all materials in the website are in Azerbaijani...

More than 50 articles (by 31.07.2015) written by Vahid Rzayev, covering different spheres of science, published on above mentioned site, as well as his articles published in republic mass media and in other modern mass media recommended by Himself are assembled in this book.

The first four articles in the beginning of the Book are Chronicles reflecting very ancient history of Azerbaijan.

All the articles are about unknown facts in the world and about different spheres of science. They are so capacious and original that any contrary word is inappropriate here.

As 5 books published in 1999-2000, this book also serves for interpretation of the **Main Book – “CREATION”**.

I should also remark one fact that in all above mentioned issues and works I acted rather as a coordinator, and preferred to participate in scientific discussions on subjects within my interest and comprehension as a listener.

But as a result of my observations during these years I feel it my duty to say with certainty that all written by Vahid Rzayev in his previous books, and in the book entitled “We Started Existence from Existent” according to his own words are **“Postulates”**:

---

*- There is a term – “Postulate”. Postulate – is a proof that does not need proving. Postulate – is produced of Axiom, it is a proof in proof. Axiom – is a proof in proof, it is absolute. Production from Postulate is Eureka (I found).*

You should just read attentively, think and comprehend the texts written by Him.

Mister Vahid’s elder brother Fikrat Rzayev used to write preface for all his books published by present time, but now he is not in this earth life among us, and he is in better place. He used to call me “my brother”, thus I tried to replace him in some meaning, but I decided to write this awterword, but not preface, so that to expound some questions.

... On 27.07.2015 towards evening after working on this book together with Mister Vahid I had to go to my daughter Gunay’s house in my close neighbour Anar’s car, whom I met often the recent times. We had small dialogue when we got out the car. He told me in Russian:

– Uncle Miri, what is the matter with you today? You are all shining – he said.

– Anar, we are preparing for publication a very important book, most likely that is the reason...” – I answered.

– Really?...

– Yes, Anar, I will show you the book as soon as it is published...

– Agreed!..

...When I give him the book I will have an advice for him: “I will advise him to find out the 3rd part of the book “The Talk

---

about Creation” by Vahid Rzayev and Fikrat Rzayev published in Baku in 2000, and look at the 142nd page of the book”. I think, in spite of that book is in Azerbaijani, it would not be hard for him to read this book, as it was printed in Cyrillic alphabet...

*Miralakbar Seyidov*  
(Baku; 31.07.2015)

The Book “Postulate” presented to you contains the author’s scientific-philosophic articles serving for interpretation of the “CREATION” BOOK.

In the name of “AqRa” Public Association on Support for Advancement of Science

Mirakbar Seyidov – Chairman of the Administrative Board.

---

## **Our Creator**

Our Creator does not sleep – He does not sleep, He does not slumber!

If the Creator sleeps, all Creations would sleep!

The Universes would sleep, speeds, motions, successions would stop, and the Universe would be silent!

Chaos would start in the Universe, all planets, Galaxies would get in confusion – Darkness would surround, confusion would rule!

The Creator does not sleep, He does not Sleep, and does not slumber, He does not dream!

Living creature sleeps and slumbers as well!

Just the Universe, the all motions in the Universe (speeds), the planets neither sleep, nor slumber, they do not be tired, exhausted or bored, and they do not stop as well!

Because, the Creator who gives them motions and regulation neither “Sleeps”, nor “Slumbers” – That is the reason!

## **Oval, Ellipsoid Calculation...**

It is very considerable that we can see existence of any being.

And we know that it has initial state.

Its initial state, initial state of all these structures was known to the first human on Earth.

---

As the structure of this World is Oval type, Ellipsoid type and all beginnings are within its frameworks, its shape and calculation was known to them.

It is impossible to give calculation manner to any state not having calculation methods, and not basing on any state.

Pi being equal to 3,16, is a method of measurement of ratio of long arm of Oval, Ellipsoid to its short arm.

As Pi estimation is by 16, and exact half of the first Sun alphabet consisting of 32 letters – 16th letter is “P”, and geometrical, mathematical calculation of Oval as Pi has the meaning of “P” letter existing in Alphabet, that “P” letter means “Brightly lighted by lightning”.

Our grands on Earth made alphabets in accordance with meaning content of every letter.

For this reason number and meaning content of the letters in alphabet was considered to be very important.

As there is not an angle image within Oval, it cannot be calculated by angle measurement method.

Nevertheless, if to divide existing area of Oval, Ellipsoid into four, we get four equal areas within Oval.

In that case, inside of Oval divided into four parts, four equal angle forms come out.

Thus, if total number of angles is 4, each part is  $90^\circ$  (initial 9 in the Universe), one half of Oval is  $180^\circ$  and its another half is also  $180^\circ$ , then  $360^\circ$  total estimation comes out.

Human’s anatomical-physiological state also complies to the rule within Oval, and his 18th age ( $180^\circ$ ) – his beginning state

---

as full maturity age seems very conformable to condition within Oval.

If to refer to the texts of Heavenly Books, there is written: “I Created in six days”.

Certainly, that calculation was not by “Sun measure-ment”, but was by Period calculation.

In this case, in calculation of Oval, if in one half area of Oval – its right side is in Three periods, and its left side is in Three periods, then it makes  $3 + 3 = 6$ .

According to this calculation, total of one semicircle of Oval and its opposite semicircle makes  $6 + 6 = 12$ .

### **Cluster Motion of Light and Particle**

H.Tesla’s invention of “alternating current” could connect mankind with the world of Light!

Electric current was brought to 50 hertz frequency!

That 50 hertz frequency serves for regulation of the state of electric Light by quanta (that is, we observe discrete quantity of light current, light torrent by parts, or more exactly, its flashing state, as a “light current” in accordance with that 50 hertz frequency)!

That is, we can observe electric light state as equal-degreed.

However, equal “Regulation” degree of the Light current exists in the Universe system too!

---

As all masses (planets) within the Universe conform to harmonious speed frequency, speed Regulation!

That is, the all planets in the Universe are within Regulation of 16-unit speed (it is very high speed)!

Proportionally to that speed frequency, our (alives') sight frequency is proportional to 16-unit frequency speed too; seeing the objects we can watch their traverse state parallel to that 16!

Is there another traverse speed in the Universe?

While traverse speed between planets is regulated by 16-unit, traverse speed of the Light and the Particles of the Light is appropriate to 64-unit regulation!

We can easily watch movement of the planets for the reason that we see them together in convenience with frequency of our eyesight (16)!

But as the traverse speed of Comets and Asteroids in the Universe is proportional to 64-unit speed, we observe them with a Light "tail"!

Proportional to that traverse speed, we can observe cluster of free Particles in the Universe (proportional to that speed) in one cluster!

When those asteroids, comets fall on the earth, touch the earth (Tungus, Chelyabinsk meteorite), big Light-Particle mass, unity gives very intense diametrical Light!

If the speed of the planets between Universes was not 16-unit, but was appropriate to 64-unit traverse speed, we would see all planets in surrounding of very bright Light proportionally to that traverse speed!

---

And the speed of our thoughts would be very different than their present speed!

Light of the Universe exists, but we cannot see that Light Amount as is, proportionally to our eyesight speed!

And it does not mean that this Light does not exist! "His" Light is Invisible!

We should have eye to see, we should have ear to hear!

During millions of years all mankind is considered about one question: "Why can I not see Tengry, Tanri, Creator, God?".

The reason is that human's vision speed is given to see masses, items, beings in the world that surrounds him!

If human, alive being was given vision speed more than 16-units, i.e. 64-unit and more, then he could easily see that Light Amount!

Being and Condition of that Light, Particle is not secret. These states are in proportion of the Law of the Universe, the Law of Motions!

### **Sayings**

*(a part from "The Talk about Creation. Part II")*

F. (Fikrat Rzayev) – Tell me more about the Great Creator's Sayings. These days I don't perceive what I have heard as something strange, they are not so far. But, I have heard and

---

coprehended them gradually. And you had concealed all these during the long years even from me.

V. (Vahid Rzayev) – The Sayings had started being sent to me gradually since the late 1972 (November 28). Previously I was perceiving these Sayings very calmly. I did not use to see anything strange in it. During 27 years I kept patience and received these Sayings with patience. I used to think that these Sayings are heard by everybody, and these worlds are seen by everybody. During our initial, short talks you told me that all people do not hear and do not see them at all.

Look at the symbols (musical notes) of a musical composition (musical score) before the music sounds, look at those mysterious, encoded “confused writings” of those notes that are initially incomprehensible, but actually consist of music composition, of harmonies...

[F.- Vahid knows that I am unfamiliar with musical notation, and they really bring me to “confusion”].

V.- It is a part of Universal harmony. Will it be comprehended, if that greatness is not sounded, if that greatness is not said?

Would Divine Sayings be comprehended not being Said, not being Sounded? And if it is Said, Sounded, comprehended, can we keep away from the Divinity, from that Divine Creator? Divinity is known by those who hear, and those who comprehend. If you know it, you know Eternity; if you know, you rise up to Eternity, rise up to Holines.

---

Divine Sayings from the Great Creator are not for ill people. Divinity is not illness. Also the Great Creator is not Abu Sina (Avicenna). Divinity (mental) is not illness, the universes are not hospitals. Divine writings are not drugstore.

We seek for justice saying “Justice, justice”. The justice is in heaven, we seek it on earth. The justice would not appear by saying “Justice, justice, justice”. The justice would not come down to earth, if the justice is absent among people.

Human acting unjust cannot see the Great Creator, the Great Creator would not come down among injustice. The justice would not seem by saying “Justice”, the justice would not seem among unjust people.

The Great Creator would not seem; the Great Creator would not seem among the people that don't believe in each other. The Great Creator would not come down, would not occur. Divinity is Divinity.

That Black creature does not hear (cannot hear). It does not hear the Divine Sayings. That Black creature sees conditions, but does not hear Divinity. If it heard Divinity, it would influence sayings during the saying moments, would blacken, falsify the Sayings by its blackness. Look, where Divinity is, look where Divinity is from. Look, the Divine Sayings are from Creator.

Divine Sayings are not brought by human, they cannot be brought by human; They are not brought by mind, in mind, if they are not from Creator.

*from the book entitled “The Talk about Creation. Part II”  
pg. 108 – 109; Baku, “Nargiz” publishing house, 1999*

---

## Water, World and Alive Being

It is said that water is the meaning of life. Water is life. That is right.

If to look at successions and going processes, water is incessant, inexhaustible being. Where is origin, beginning of water? (if there is not beginning, there would not be a result, there would not be a meaning) What is water and where is it? Which going processes is it resulted from? In own functionality of water there is its light, memory carrier feature. Where does water take that Initial Light and memory carrier feature?

The point is that, a core exists in the center of the Earth planet proportionally to its mass. The core of the Earth planet is considered active core. Because that core carries leading, equalizing, regulating, consecutive functions.

The core in the center of the Earth planet is in solid state, but in human body nodules are like knots in a tree (these nodules gather and keep in themselves substance quantities). The core of earth: - that core stabilizes (equalizes, shares), but is not carrier of transformation function (gathering and keeping in itself). This is difference of these cores from each other!

That core (Earth) is like pearl in shell. Its color is White, its shade is light blue. Working principle of that core is neither like Adiabatic, nor Absorption and chain reaction.

That pearl within a shell gathers volume quantity from that solution. But working principle, working activity of the core in

---

the center of earth shares from itself, but does not gather, does not gather in itself. What happens in it?

Circumference around the core is in surrounding of diametric circular solid Crystal. Light quantity separated from itself is smooth, equal, soft and unperturbed, and passing through that crystal layer that crystal (like alunite, transparent rock-salt crystals) reflects itself in bright light unity. That crystal layer being saturated light capacity, its edge borders gradually pass to the mass turning into equal limpid state. Motion is given to it by the core, as well as it is brought to motion by the core.

That existing being turns into limpid state, brings the layers, stratum to mature state, thus produces subsoil assets (minerals), and finally rises on the surface of earth. Initially that limpid crystal being has bitter taste (like quinine in pills). The reason of such condition of that being is that it brings the layers, the stratum to mature quantity, as a result its being becomes clean, transparent. For this reason that liquid does not take taste, color, it is free being (we can also say auto-nomous in this case), and on earth it is called "Water".

As initial state of that water has crystalline origin, the rivers, the seas, water basins on earth are carriers of brightness and light, they are reflectors of light.

Let's consider an example: if to keep rock-salt, moist, water separates from that rock-salt in the air, under sun light. If water freezes, it turns into crystal. That is why water is own being, own content, own memory carrier of our planet. Water is limpid

---

condition of light from initial crystal layer surrounding our core (Crystal gives light, but does not collect in itself).

This life on earth is not without water, without salt, without taste, without oil (without carbohydrate). The oceans, the seas on Earth are not without salt. Water has two states. In one state it produces the layers, the stratum of earth, subsoil assets, and in another state it gives Creative Light to plants, to all alive.

Where does the core of Earth get its creative light portion? The matter is that, the core of Earth has parallel connection function with the core of the Sun. Thus, activity of the core of Earth is in light power correlation in the period from March 18-21 to August 18-21. The core of Earth is active during 6 months, and is silent during 6 months.

From March to August activity of the core makes the layers, the stratum matured, thus in this period it makes the vegetation matured too. In summer water on earth surface becomes less so that to share moisture equal between deep layers and vegetation. So that to gather heat and moist quantity, that were spent during 6 months of autumn and winter within the globe in equality. In winter the surface of Earth becomes cold because of this reason. The Earth equalizes heat and cold and moist.

Just as the reason of round shape of the globe is construction equalizing the temperature within the globe between two poles by globe belt (equator).

Apart from the Sun, as the cores of the planets around Earth are passive cores, in those planets water separations from deep

---

layers are in silence for the time being. But we cannot call them ordinary planets. They are also light, memory, state carriers.

Thus, you can be satisfied of thoughts, you can be satisfied of relations, and you can be satisfied of hate, of lie. But you cannot be satisfied of these four notions: light, water, salt, bread.

Because they are presents of the Universe and Earth to us, and alive beings cannot exist without them. That is why it is said that “I am light, salt of life, water of life, bread of life, and whoever tastes them cannot be satisfied of them”.

What will grow if there is no water? What will grow even if you plant over and again? What will come if there is no water, how human will come to this world, why will he come? So creation is a particle of Light in this earth life, and heat is its environment, water is its memory, and soil is its period.

### **Whisper**

All beings, the Universe whisper, say!

What does they whisper, what does they say?

All they, tell the Initial!

We should have an eye – to be able to see, we should have an ear – to be able to hear!

The Universe and the world surrounding us function by so simple mechanism...

We have made them so complex by not having desire to explore and be aware of them...

---

## “Spiral”

Every creature is created not because of compulsion, but because of necessity. Every being has desire to seek and cognize its Initial not because of compulsion, but because of necessity. After the great explosion absolutism become memory carrier in sound memory, word memory, harmony memory and color memory of the Universe.

A speed begins from start point (expansion). That start point is incessant “driver” for all created beings and for those that will be created. However, the start beginning from one point (as a result – a spiral model) is a sign for equality of symmetric incessant speeds succession of the beings in the universe.

“Spiral” is a model of successive movement of the planets within the universe between each other. The start (it is called a point) is not geometric structure, mathematical succession, matter, physiologic– biologic being. That initial creating light is initial state, successive driver of every condition.

A start beginning from every “point” is total sum of all features of that absolute creature. Initial point: is beginning, maker, driver, manager of all beings, regulator of all Absolute motions, masses and etc.

It is beginning from Initial Absolute, from “Light”.

Initial state of creation of oval and the planets housed in it is from “one beginning” (not from one point, beginning is a state of continuation in necessity), and that beginning support is indication memory of start and one inside another motion state

---

of Absolute, of absolutism Feature. This “spiral” form is reflected in its structure.

“Spiral” meaning is a state of initial stage of successive motion and one inside another speeds given to the planets in the universe, and it is called “Spiral”.

The first human on earth was aware that the all Universe system, Galaxies are in a motion around and in surrounding of one Light being. They cognized it as Initial Driver, marking that structure form by a “point” as a symbol.

They also were aware of that the Earth planet is in motion around light (the Sun) too. It put foundation of the first astronomy science.

### **Human and Speed**

The Earth human can think in accordance with the speed of the planet around the Sun equalling to 500 km/sec.

From 1900 he started thinking in accordance with the speed of 650 km/sec.

From 2000 the Earth human could move on the next mental thought speed equalling to 800 km/sec (proportionally to movement of the Earth planet).

Recent years people started complaining about dizziness, giddiness. It is not a disease and not a symptom of a disease. It is speed of information on the surface of the Earth planet, and

---

the head, the brain places the information of different frequency in memory cells matching this speed.

We should get ready for 1000 km/sec information frequency speed.

Let's come closer to information frequency speed of the Universe now.

### **Humans and Voices**

Even if the people on earth know each other very well, they recognize each other again “hearing” their voice and by their “name”. It is the same within a family: among family members each member has his own voice and his own voice frequency. Even if one of the family members is not near, we recognize him from distance by hearing his voice.

People recognize and differentiate each other by name and voice. That is, his name is Vahid, but when hearing his voice among several people we can surely recognize that it is that Vahid's voice, but not of other's.

Recent years astrophysicists try to detect by means of radio telescope if there are other civilizations in the universe. They send sound signals of different frequency to the universe for this purpose.

The wonder is that, when accepting response signal from the universe the sound of great explosion occur in the universe. As

---

a result of different scientific approaches it has been concluded that it is the sound of creation of new universes.

However, this sound is the base sound memory of the initial creation moment of the universe, which still remains as memory and will remain.

If the base sound memory from that initial great explosion in the universe had not remained, joint harmonic movement of the planets within the universe would stop because of silence, calmness. Existence of the sound in the universe is the main, leading, push factor of the continuing movement of the beings and masses.

The fact that the beings are in surrounding of the sound means that the being still exists. Sounds and sound frequencies are initial base and one of the mechanics of creation of the universe.

Though silence would deprive the worlds, the nature, the humans of favor to think and to make thinking.

### **What is Energy?**

Energy is transformation of light factor into heat factor. Heat is changeable by temperature degrees, but light is unchangeable (neither its frequency, nor its speed).

Temperature belongs to material world (what we touch, feel, measure, compare). Absolute Light Posessor is Creative (absolute) Divine World that does not change!

---

As it does not change (base), it does not disappear, does not lose as well! The Light is Father and its productions are Particles.

### **Human and His Body**

Working principles of human's body organs are known, and at the same time unknown!

Humans are aware of (there is no need in proof) that they breath, and they are accompanied by heartbeats.

If one of these two states stops human may part with life.

If human, alive being does not breath, he is condemned to death, and if the heart does not beat he is condemned to death as well!

Does the heart bring the blood into operation, or does the blood bring the heart into operation?

It is the blood that makes the heart to operate!

But why do we breath unceasingly?

What makes that breath to operate?

Human's heart beats 72-74 times in a minute. Human breathes 16-18 times in a minute on average! (that is, breath is less than heartbeat approximately in tree times. Air content of the blood is proportional to it).

Apparently, we breathe more frequently while running speedily so that air proportion and temperature level would not rise, would not increase. The breath is regulated by speed of

---

blood, by its regulation so that not to let plasmatic proportions of the blood to be disordered.

Amount of blood passing through heart regulates the breath.

Breathing mechanism is different for fauna and flora.

We breathe (fluently) with oxygen, with air not forcibly and consciously, and we don't even worry about "forgetting to breathe".

How does breathing mechanism work (without force)?

The matter is that, water, oxygen is regulated proportionally to light spreading speed of the core of Earth.

Breathing is regulated in accordance with frequency of water that rises on the surface of Earth from deep layers, of intervalled oxygen that separates from water; and fire flames for the same reason!

If there was not water and air separating from water, there would not be fire, we also would not be able to get fire. Why does water poured on fire put it out? Because, at that moment water amount turns into steam, and moist amount in fire increases. Air flames fire and water puts it out!

If there is water – there is air too! If there are water and air – there is temperature!

If there is fire, wind, then air increases at that place. Moist extremely increases because of high temperature level, proportionally to it air and wind become stronger!

For total mass, inexhaustibleness of minerals and Water is regulated in accordance with light spreading frequency of the Core of Earth.

---

## **Languages and Words are Related to Universes**

Though historically initial words in speech of mankind were very short, they were meaningful and had been generated on basis of great logic. The words and vowels and consonants constituting them, as if expressed consistently flowing motions in universes, different states of the universe and of its bodies by concretized code forms, and that feature has been saved at extended and more solid present state of speech as well. That is, any sound is not separately related to concrete territory, a single individual, a definite tribe or a nation, but it is related to the Universe itself.

Therefore, generally speeches resemble harmonious, classic music, and words resemble its parts. The all words of mankind, and languages that seem different *prima facie* are related to universes, and the universes are related to the Creator. Consequently, as in all areas, our languages are related to the Great Creator too, and we are in Unity with Him in all spheres.

No nation had created a nation or itself, and no nations had created their languages as well. If any nation could create a nation, then the nation itself would be a creator, but would see itself isolated from universes. But it is not possible by no way, because we exist as exists the Universe and our world which is in Cohesion, in Unity with it; and our languages activate in this Unity, in accordance with its Action harmonies. Therefore, the language is not just ours, but it is also of the Universe, it is a

---

reflector of the states, actions of beings in it by means of human speech, it is their exponent sounding in one Tune.

Existence of every macro and micro substances, any particle in the Universe is not beyond necessity, and they are important participators in outcome of the Whole. As their action occurs without chaos, and in purposeful way within any time-period, it performs concreteness of the Universe destinies. Correspondingly, the Universe has its Memory. Therefore, in compliance with such memory copied in human being and expressed in his memory, activity, actions, every thought in speech is concrete, and has to be expressed and is expressed by concrete and short words, therewith complying with established systematicness. Such systematicness optimizes the number of sounds in words, and also the number of words in sentences for fully explanation of ideas, contributes to meaningfulness and fluidity of speech, though prevents their unceasing lengthy continuation, and thereby, prevents men from difficulties, from wasting too much effort and time for conversation. Because the number of words completes the logic. The Logic is settled in Absolute, and the Absolute is settled in quantity and functionality of phonemes. Their number determines completeness degree or fullness of thought volume established for this language. One idea can be expressed by many words. But this possibility may take the idea not to total completeness, but to nonsense among many words. And addition of a new sound in phoneme fund of a language means addition of new, greater philosophic, Divine logic. Divine logic itself expresses an idea by short words and sentences,

---

but thereby brings enormous concepts to humanity. Functional assembly of phonemes indicates current quantity of universes. The currents here complete each other, and declare a new current.

The scientific values that my brother Fikrat Rzayev brought by this book about functionality of phonemes are related to universes themselves, and as if lift everybody acquainted with these up to there again. And the universes, as said above, are related to the Creator, and we mankind being related to the universes, are related to the Creator.

A man who is able to think, to analyse his thought is so happy. And Fikrat Rzayev is one of those happy persons; his happiness is in scientific investigations, in scientific conceptions. "Thought is a thought, – it is thought of Fikrat. Think, for he is in thought too: he thinks of the universes and thinks the same way as the universes. Being connected with them, he is in thought of the universes?".

## **DIVINE THEORY ON CREATION OF LANGUAGE**

Conduction of researches on linguistics is important both for solution of its other problems, and for clearing up when and how mankind learned to speak, to favour human to perceive his being, and to cognize the secrets of the Universe where he and his world exists. Therefore, since the early times scientists have introduced a number of different theories about origin of

---

language. Formerly sound imitation (mimic) theory, theory of exclamations, theory of public consents, theory of gestures, theory of labour cries and other theories on creation of the language had been introduced. These theories had certain significance for explanation of some directions in development of languages, but in general they were not the main sources of creation of the language. They were widely elucidated in linguistic literature, and were strongly criticised by scientists who declared that, “first of all, human itself and society are possessors of the language; so creation of the language has to be associated with them”.

Most nations in the world fairly allege that the language was created by a divine power. But as it so far rests upon frivolous ideas invented by themselves or upon religious legends, science could not accept them in no way. Therewith in spite of spreading of different religions on the Earth in the past and at present, they have not been systematized and elevated up to the level of a common Divinity Science up to date. Indeed they were dogmatical, and available literature was not enough for investigation and elucidation of such complicated matter as determination of origin of language. Therefore, scientist-philosophers historically giving up religious views also stated that the language had been created by the nature. And it is unscientifically. Because, “nature” concept used to imply just jointly integrated existence of beings on the Earth and in the atmosphere, of there states, actions and of the processes occuring in them. And these are not separate from Unity

---

Current of the Universe, of the actions in it, and are not particular. So, the language and its creation have to be also related to the Universe, to beings, events, actions and processes in it.

At present basically dialectic-materialist theory on formation of language has been accepted. It is based on the history of creation of human, society and affirms that human was created of animals, and labour was the main factor in his creation. Though this theory seems attractive from distance, but it does not fully and correctly attract reality, historical truth, and is not based on the linguistic itself. Because philosopher-scientist F.Engels, who introduced this theory, and his supporters just used to accept the nature on the Earth as a theatre stage, as if they saw inner phenomenons in the nature, analysed them, but could not notice and appreciate the states and events behind the stage. The literature needed for it almost was not available thenedays. And also development level of science in the XIX century when this theory was introduced was much lower than now. In spite of that in the XX century physics succeeded in dividing atom and his particles in more little parts by way of acceleration of their movement and causing to collide with each other, materialists could not fully clear up yet how matter itself was created and what it consists of. Besides the materialists did not pay attention on that the Scriptures, including the Qur'an, the Bible were Sent from the Heaven with ordinary human words, human language and speech, and had high artistries for that time.

---

Therefore, correct determination of origin of language will be possible after finding answers to the following questions, which remain being problems up to now:

- How was the life on the Earth and in the Universe created in fact?

- How and why were the biological beings known to us as earth human Created?

- Does just biological human have language, thought, hearing abilities in the Universe?

- Do the words being one of the main units of language conform to common Universe Unity laws?

- Who and how had created the languages?

It is wonder that modern men, who has to advance towards Evolution, almost do not have information about the Universe, its alive and lifeless beings, as well as their works and activities. Even human does not know why he came in this world, why he lives and what and whom his “soul” will meet after leaving this world. In a word, he is uninformed of himself and lives blindfold. Modern sciences and religions as a whole gave him unsatisfactory and not convincing information about it. Though the most of these or that problems stated above have been covered in literature since 1999 [3-5], in this addendum we present you a bit wider explanation of some matters concerning the topic.

---

## Short Information about the Universe and Its Beings

As comprehension of the most people on the Earth is limited at the moment, they think that the Great Creator and Beings in White (angels) in the Universe do not have other duties except for engaging in victuals, fates, birth and death of men. But the fact is that, because of great number and variety of alive and lifeless creations, as well as civilisations they have quite a lot of works in Universes except for the Earth, and quite many different Management Systems had been organised for their execution.

If to approach from position of us men, since the first Creation of the Universe up to now, we can divide its and our history into the following stages:

1. The stage before creation of men and other creatures on the Earth and alongside with it on other 5 planets after the Great Explosion;

2. The stage of works on development and reproduction of the creatures and men on the Earth;

3. The stage of Evolution of men after all Beings in White and most of Adam Sons left our Planet (this stage includes the age of Prophets and all history up to present time as well);

4. After that it is start and continuation of “Gold Ages” stage on Enlightenment of men and their Humanization on high extent alongside with their Purification in the future as well.

---

## Start of Life on the Earth

The first Creations from Prime, Holy creations from Holiness in Manifestation of the Great Creator itself, with his Pure Light were Beings in White (angels) and they were considered the first Executors [3]. (Saying “Manifestation” of the Great Creator itself, it is meant resemblance of the Creator Himself by appearance, but not by His Being scope. And His Being scope is a generic Light scope, a Creative Light of the Light particles that He Emitted from Himself for Creativity). Like the whole creations own a portion from the Light of the Great Creator, they also being in White, Life-long, Eternal were among the universes, free in Freedom, Holy Creations. Every creation is an Eternal creation. All universes, all beings are under the Great Creator’s Sight. The creation particles are in a unity, but also every particle is within His Tender, Patience Look, and every creation is with Him, Around Him, within his Own Look.

Plenty of time was passing since the Creation Instant. The all Creatures were in a Unity with Him. The Holy Creations forever were in the universes, in free Execution, in a Solidarity.

According to calculations of astrophysicists on the Earth, the Universe was created 15-18 billion years ago. And start of life here falls on 3,5 - 4 billion years ago from present time. We also base on this period as a time of start of life on the Earth, and go on our talk.

---

Till then, as we told, the Beings in White were in free motion in the Universe. As Being of some of them had a portion of the Holy Light, the fact of being within a Light relation, in Unity on the planets existing in the Universe provoked them into supposition about possession of independent creation power by themselves. Those beings in White, those angels each had separate execution function in creation. But that was not the reason to raise Themselves up to the Creator's level and to consider themselves equal to Him. And there was one factor that could take to such idea. No state is without a reason, and no reason is without a state. Because, every new creation Created by the Creator was starting from Holiness, from Holy creation. If the Holiness had irreproachable base, the Light flow in galaxies and megagalaxies would have more fluent, more smooth current, and would become more powerfull with a Solidarity motion. But Black Being started trying to bring disorder among the universes, to disturb the smoothness, the sequence by reducing Holy Light surroundings of every being created from the Light. Hereby, for the first time the difference between the Creator's First Holy Light and the Black Being was revealed. Thus, when those First Holy Beings in White had to divide equally the Holy light scope in them among the creations, they supposed themselves to have Creative power of their own.

And the Great Creator Declares to those beings in White that "I Created, I Created the Primary. I Created the Primary by Scope of My Light. I Created the Primary of Oval. I Created those spaces amidst the Oval. I Created the First of motions

---

(sequences) in one Unity. I am a Creator, I am a Creator of creatures. I Created Initially the First Holies with Holy Light Portion. I Created them free among my universes. I Created them in My Appearance, in My Resemblance. I am a Creator who Created the First Creations Holy from Holiness. I Created the Firsts from My Light Portion. I Created you in one Unity among Creation, in one Execution. You considered My Light Portion in Yourself, with yourself, and you considered My Light Portion a power for Yourself in Yourself. I am who Create, and the creatures are who were created”.

By that time those beings in White were Numbered within numbers in their rows. But, being among the Numbers, they moved away from the Numbers. Though, they was not Away from the Great Creator’s Look, His Mercy, His Patience.

“They were primaries from the Prime; - Let them be Returners to the Prime, to Holiness, to be Returners to My Patience, to My Tender, to Initial” - the Great Creator decided by Himself.

Instance was giving way to instance, period was giving way to period, and the all spaces were continuing their harmonious motion in the all universes. Nevertheless, The Holies who were thirty periods away, were not away from the Great Creators Mercy, Sight, Patience again. By that moment every space in the Universes had space in its space, every space was by Itself, in its peculiar colour.

The all creations were in the Great Creator’s Surroun-dings, within His Look, His Light, all spaces were continuing in

---

Harmonious Motion with each other, in one motion under His Look. The first space around our Sun space was the Earth, which was yellow and 10 Holies were Sent here. The Earth gained strength from the Great Creator's Light scope, Nucleus formed in its center, that is, the Nucleus warmed up by the Light, and a heat escaped. Moistures exuded from layers in that space. Water approached the surface, became a face on the surface, the water came out on the surface of the Earth.

The Sun is in its space, in its place, is with the Earth. It emits light making the day-time, it stoops down making the evening. Its a memory for whole creation of the Earth, that is, **“It was dark, but I made it bright with Light”**

The Earth space was distinguished among neighboring planets around the Sun. The clouds here were generated from evaporation of the waters exuding from this space itself. Creation in this space is by water, by Itself - by the Nucleus. In all spaces a matter called “moisture” is in that space itself. In the Earth space water exuded from initial, - water rained down, water exuded during seven days, water rained down. Water exuded from clouds, water rained down. Moisture exuded from space, from the layers, water rained down. In all universes six spaces were separated around six sun spaces. Moist exuded in these six spaces, - water rained down. The Holy creations, - those who were away from Numbers, remained separated in the same community during seven times. And the Great Creator was based on His Principle saying **“They were primaries from the Prime, Let them be Returners to the Prime, to be**

**returners to My Pure Space”, and ever since this Principle was generalised for everybody as a law, and became common. Meaning of the Holy’s Message: Return to the Great Creator, - had to be in time, in moment and was strengthened by the purpose that “Eternal Creation from Eternity, - is a creation returning to His Eternity. A sending assigned from Prime, a sending returning to the Great Creature. Assigned to that space - is assigned of Holies, assigned to Forty times, assigned to return to the Prime. Unpunished creation from the Prime, - is creation that has to return to the Prime”.**

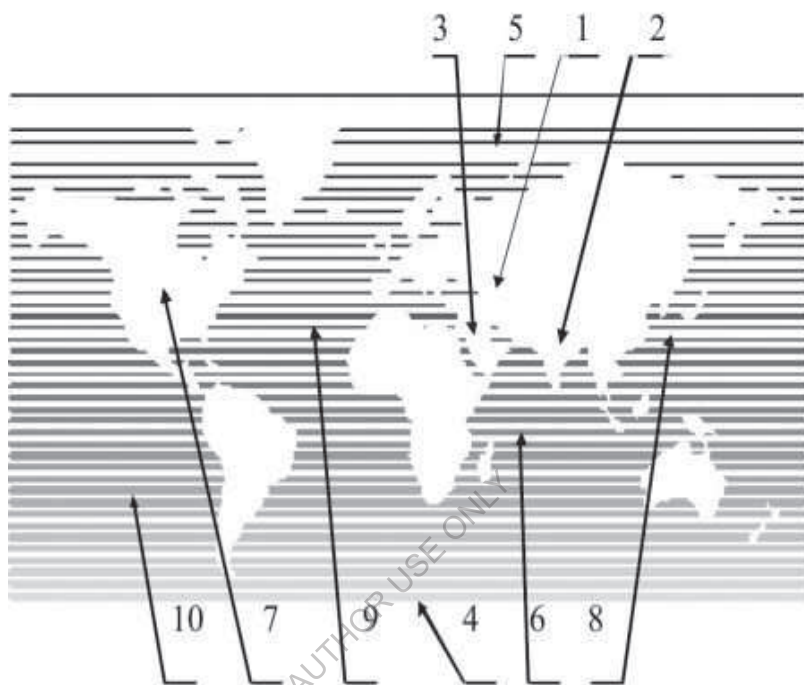

Little by little in this space the waters were growing by water, grown waters were joining with separate basins. Each of Holies being away for forty times had one name, they were Named (table 10 and picture 1).

**Table 10**

***Names of Holies and Their Residence Territories***

<i>No</i>	<i>Names</i>		<i>Territory (In accordance with modern geographic state of the Earth)</i>
	<i>In original</i>	<i>In English</i>	
1	MƏN [məɲ]	MAN	Around the Caucasus and Southern Azerbaijan
2	HƏM [həm]	HAM	India
3	ƏN [ən]	AN	Arabian Peninsula
4	ƏK [ək]	AK	The South Pole

5	ÜZ [üz]	UZ	The North Pole
6	QIT [gıt]	GIT	Southern part of the continent of Africa. The territory remaining under The Indian Ocean. (This Holy had longwise line on his forehead)
7	TƏK [tək]	TAK	Continent of America
8	LAP [lap]	LAP	Japan and territory of southern islands
9	DÖN [do:n]	DON	Between continents of Africa and America. That territory (continent) in the Atlantic Ocean remained under water
10	ƏDD [ədd]	ADD	Those continents in the Pathetic Ocean remained under water

***Picture 1. Residences of 10 Holies on the Earth***

Return to the Great Creator had to be in its Time, in exact instant. But the time passes, the instant goes by, Holy sending was looking away, - was looking away from the aim. Their Holiness was not harmed by the Great Creator. The time passes, - those Holies are with earth light, with the Earth; but the Great Creator does not Break His Word too: “The Holy’s return is by his deeds, by Self, his return is by himself, by Self”, that is, it had to depend on goodness or badness of his deeds. Therefore, it starts the age of holy creation from Holiness around those

---

Holies: “wheat - is a holy creation, rice - is a holy creation; a creation with assignation, with light in particle, a creation assigned to those Holies”. Because, the Great Creator knew that for materialized beings, the beings living with materiality (*for metabolism*) nourishing were necessary.

We said that, holiness of those who were away from ranks of Holies, - who were within the Great Creator’s Sight, Patience in this space is not Touched, and punishment is not applied. The times passed again. Holy kept being sole, kept thinking; kept looking to the Great Creator’s Space, but his return to Holiness was delayed.

Since creation every space is Assigned, they are with stone, with soil. But for Holy this space is with water, with stone, with soil. Water is also pure, is for Purity. Those Holies became sole, - became thinking.

There is not food in Holiness, there is not sleep in Holiness. In Holiness Holy is with Pure Light, with Eternal Light, there is not nourishment There, he is with the Great Creator’s Light, all universes are with the Great Creator too; they are the Great Creator’s Manifestation. The first Holies are those who were Created by the Great Creator, who stay around the Great Creator. But in the universes beginning of the spaces is by water, by waters. The Earth space is also with waters pure by being. Material is with materials, beginning of the materiality is with water, not alone. This space being is moist in the layers, is with pure waters. In the universes the center of every space is with Light from Pure Light, but not with fire. The matter called

---

“Soul” in human being is with Light Portion from the Great Creation’s Light. This is not a fire as well. Beginning of every visible Being is from Light. The matter called “Soul” is also with Light, the matter called “material” - is with materials, it is not alone, it is with Light too. The matter called “Light” is from Creation, from Creator. White light (*Sole*) in human’s breast will return to the Great Creator.

White clothes of the Holies with the lapse of moment turned greyish colour of ground on the Earth. At that place the Holies had been in Holiness - three thousand years, and then four thousand years. Afterwards in that place the First Holies materialized with materialities, that is, with Purity being the beginning of materiality, with water in Purity.

Women, our first 10 Grandmothers (*Eves*) were sent to them.

The all uuniverses are in motion around the Great Creator, every motion is with harmony, in common Harmony. The motion of the all universes, of the spaces becoming Spatial is in Harmony too. The Harmonies are not absolute (*absolute - is together, in one knot*), relations of all universes and creations, on the universes are not without harmony. The Harmony - is a creation, a creation together with the spaces. Harmonies in the harmonies are different. It is identical to being, its self - is various, that is, the harmonies are variegated, therewith they are variegated externally, but not absolute.

Creation of women is initial creation with initials, is creation from Harmony. Existence of women is connected, united with harmony features of the all universes. Harmony of the universes

---

- is a unity harmony, inimitable flow harmony. The Holies are from Light, but their women open barrier of Light and dark, open with flow from flow, open Light barrier with dark. The women are those who were sent from Surroundings of the great Creator's Space to the Earth planet.

We said that, the Holies in this space kept looking from afar to Holiness that they had left. Their Remoteness in forty times is for their return to Holiness, - but not a punishment. Those who went away from the Light - are not Away from the Light. As they are within the Great Creator's Mercy, within His Patience, they are not away from His Look. Though their dispatch to this space was not a punishment, but it was also impossible to stay here forever. As their dispatch was by the Great Creator, their remoteness from Eternity is impossible. Themselves - are with their deeds, but not far away.

That is why the Women (*our First Grandmothers*) were sent to this space. A man and a woman are creations in unity with all creations. The creation is not by Man, or by Woman, - it was assigned in a Particle from the Creator. Those Holies are not far from Harmony, from Unity. Though those Holies are in loneliness, they are not far from all creations in the Earth space. Those who were sent for a While, are not far from While. Their humanization in this space, their return to Prime, to Eternity after a while is not a punishment. Because, those holies are not far from Harmony, from Unity.

The time went on, and the space started changing. The islands joined in unity, - and made big islands. Then the big

---

islands joined with Great Islands, thus the continents, the mainlands formed. Waters formed basins around grounds, and the Oceans were generated.

The layers of the space shook, and surface layer - shaken by fire (*by volcanos*); nucleus heated in the Nucleus, space got renewed in the space (*the first mountains, hills, plains were generated*). The space grew in layers by layers, the Fire got renewed in the space, the Earth space got renewed in layers. Beginning from center, this space was ordered by the layers. The space is with water, - it got renewed with fire from layers; was ordered by layers from center. The first fires blazed up out of the deep layers on the earth. Those fires were called “Holy Fires”. In the space the Holies came in motion and started search of the Holies.

The shakings, earthquake in the Space caused first fear of the Holies; Their remoteness from their self caused first fear. They saw fire, saw it far from Lights that they had seen. They saw light in fire, but saw the fire burning their feet and hands.

They saw the first woman from Prime - in the space. Woman and man are not far from each other. Man and woman are one of the Great Creator’s Eternal Creations, the creations from His Light. They do not differ (*too much*) from each other by appearance in creation. They are not different by look too. The Light is the Same, the Light is Absolute, but harmony is different. The different is in difference, the different is not constant in difference. Male-female, man-woman being among creations

---

assigned by the Creator are mediators for creation, but not creators.

The creation is from Particle, Light is in the Particle, and the Particle was created from the Creator. The Particle is assigned to creation form Light. Every being, every Particle — exists with Light. As creation of Human from the Great Creator is assigned dispatch, man-woman, generally, male-female are with environment, in environment in the Earth space, that is in unity with material beings.

Send to these spaces - is assigned send, new creation - is new send; a plant is also a creation - it is send assigned to space. Wheat from Prime was the first plant on the Earth. It was holy send to this space, to Holies, around Holies.

Every creation, every send - is in particle, every particle is assigned send to human in space from Holiness. Every creation is a creation from Holiness, from the Great Creator, with Light of Prime, with Light. All Creations (*universes, planets*) are creations with Light for six ages. Every creation - is a creation with the Great Creator's Mercy. Materiality is with unity, the unity is with harmony, that is, material is with materials and every being is with beings too, but not alone. In this space vegetation is a creation with water as send in particle. Even if you move away a being from being, it is not away. What you moved away telling "Away" - is not away. You will find a being - in being, you will find a being in that being again. For instance, if you divide a straw, you will see a straw again. Generations, new beings started like this, they are like this. What you want to

---

divide is with its Prime, it returns to its prime, it is not separate. The Holies are the first send to this space from Prime, and then there were man, woman. What we call “Child” is assigned in Particle from the Great Creator, from His Mercy. It is a Share from the Great Creator. It is sending to this place, to human - it is a human. This send has to return to the Great Creators Holiness.

Man, woman are in unity, - they united ever more through their children, and became united.

The Holies were sent from the Great Creator’s space to Create in this space the first child - the first human; they were selected and came out of rows of Holies. Human does not see Holies, the human who reaches Holiness sees the Holies, the Holiness. Those who came from Holiness saw the Holies, saw the Great Creator’s Mercy. Then they Saw a ready born child Circumcised Initially, and they Understood that “Circumcising” is a memory to the Created human. They learned that a child is not from human, it is Assigned by Holiness, this creation is from the Great Creator, is in Particle. “Circumcising” - is memory to human: creation is not by man or woman, it is from the Great Creator. The creation is not on the Earth, with the Earth, it is with the Great Creator. It is a creation with age in Human age. Every human will Return and has to Return to the Great Creator, to Holiness - he will Return and has to Return to Holiness. As, what we call “a Child” is a creation from Purity with Pureness, in Particle from Particle, this creation is not from

---

human too, it is from Holiness, from the Great Creator, from Particle.

Initially every Holy was sole, - they became three in space of the Earth. First childs came in this space, came in the Great Creator's Look.

The first building was a house. Woman assembles the house within the house; and man being Free Creation of the First Holies, freely roams fields, mountains with his Free Creation. Those Primary Holies from Prime were sole, Free in the Earth space. These men used to help to their Grands, to those Holies in agriculture, in animal feeding, in alternating, in other works, and they did not deny their assistance not for a minume.

In this space the Holies knew that they were not alone primarily. Therefore, the Holies started searching for each other. They searched and found. Some of them were found, some of them met. Word came in word and in space. New word came from the first children too. Every thing, every being, every action was named, names came; new word came in One Rooted Conversation among Holies, new word came on that Root, a name was Called, the name came. The name came in look of the first children, and in self of beings too.

Creation of human is not in colour, with colour. The Colour - is with colour, Created human is not with colour. Those who became humanized from Holiness are not with colour; they are in Primery, not in new colour. Therefore, base of the Races existed from prime - it came from difference Heavenly Regions. 4 basic races existed Primerily (*White, Yellow, Red, Black*).

---

Eskimos were added to them. And afterwards interim races were generated from all these races.

They roamed the Earth space, those who were distant in that place met again. They were alone when they departed, and they met, - saw each other with woman, with children. A human from human became humanized, became bred within the Great Creator's Mercy. Therefore, Primary Cultures were created in different places of the Earth, the times of Primery Gold Ages started. At these times morality, culture, secular and divine sciences on the Earth were in very high level. Thenedays there was not need in present techniques of the Earth, as other techniques, other principles on the base of great sciences were ruling and were supplying every need.

As we indicated above, Primary Evolution started from water. Because, water is a factor producing physiological compounds. It contains plenty of White Light particles.

Radiance uniting with water and mud (*here Radiance indicates - the state of cosmic rays of the Great Creators's Light, Energy as well. These are directed rays, and this concept should not be confused with other kinds of cosmic rays*), generated amino acids, and afterwards one cell. Holies kept these one cells on the earth subordinate to Cosmic Energies, and their division was provided. These divided cells grew and multiplied by definite rules. Thus, every Cell separately was kept subordinate to the Creators Knowledge and Energies and generated different kinds. They also generated grass and plants and increased their kinds for leaving of animals. Existing lives

---

started rotting and disappearing after a while. They created the present atmosphere, increasing oxygen, hydrogen, carbonic gas, nitrogen, helium by means of Sun rays. The negative influences of Cosmic currents in our Planet were slightly prevented by this change. Afterwards by generation of the ozone cover it was created the condition suitable for life in our Earth sphere.

Thereby, body appearance of men was made of body appearance of Holies. To provide continuation of generations of men and animals existing as unisexual reproduction in our Planet the various alterations were made on Light shares and genes, and there were created Male-Female pairs for continuation of generation by way of sex.

Afterwards our First Holy Grands and Adam's sons having high evolution degree moved to the Heaven. (*And in the future by men's separately Purification and their Reach of Evolutions and by Return of all of them to Heaven, the event called "The End of the World", that is Junction of Start and End will occur, all will Escape sufferings of these material worlds and the people's higher life stage will begin*).

Hereby, hypotheses (suppositions) of scientists of our planet about the reasons of beginning of the life on the Earth [17] have some significance. According to them the life in our planet was created as a result of:

- 1) evolution of lifeless matter, of lifeless substance;
- 2) passage of spores of microorganisms existing in other worlds through cosmic space (*science calls it panspermia principle*) and their development in our planet.

---

Though there are analogies between both hypotheses and the information given in this section, they are absolutely different by principle. Because, development directions of any vegetation, of any live according to their functions and in conformity with environment, as well as by stages and sequences, after getting on the Earth is Assigned by the Great Creator and sent by Him as encoded in particle memory. This does not absolutely, categorically disprove the evolution theory known to people on the Earth by now. The evolutions go on the Earth and in Heaven, in all Universes, in Unity. That is, in every current stages included in big stages natural selections or small evolutions may appear in the nature. This is supported also by the Great Creator Himself by His Assignments, by partually Saving former life memories and by His Sends to the Earth. But in some big stages comparatively bigger, more different recognising memory codes, memory programs are Added to this memories by the Great Creator. For instance, end of age of fern-shaped plants or dinosaurs and start of living age of new species, of new classes, as we consider, is related with above stated. This way of development of vegetation and animals cannot be identified with materialization and evolution (*their decay indeed*) conditions of our 10 Grands - the first Holies. But a human is a creation which cannot be confined in Darwin's evolution theory. He has saved his being form since first materialization till now, that is, a monkey had not turned into a human as a result of labour, therefore we cannot say that just (and only) monkey was origin of the human.

---

As we see from above stated, Evolution of human differs from what materialist scientists wrote, and it does not depend just on nature on the Earth. The act on advance of evolution sequences more belongs to Heavens, to Universe and to beings in them. Founding of antique human-monkey bones on the Earth and its explanation have to be connected not with their own evolution by themselves, but with the Great Creator's Creativity and with their punishment degrees. The nature on the Earth is also subordinate to such range of common rules which are also occur in Unity with the Great Creator, with His Creative Particles being carriers of encoded information.

Therefore, the historical-dialectical theory introduced by F.Engels and other materialist scientists relying on materials on observation of natural remnants is true on the one hand, but is incomplete on the other hand, for it does not cover the Great Creators Creativity and participation of the Universe in general. Thus, both devouts and materialists should not deny each other's opinions, vice versa, they have to complete these ideas combining them together.

### **Transference (Death)**

Every cell, every atom of creatures, as well as of human body contains information owing to White Light particles, and by way of encoded direction of these informations the cells in the creature increase, develop, after some period they die and

---

get out of the body, and be replaced by new cells. But the mind exists in brain. Human's brain cells do not die to the end of his life.

After human or other lives undergo natural death, the changes occur in their brain and mind.

A man leaves this world, and departs to "other world". His Mental Light rises in manifestation of body, but the body itself does not rise.

Trio of intellect, mind and sense existing in brain is functional basis of the brain. There are memory points in brain which direct human's life. These memory points are connected with the Creator. The Creator Sends to all His Creations, to creatures informatic knowledge scopes (informations). Besides there are beings in White, the Executors who carry Informations to men. The whole of information is not of scientific character. A man is always in touch with his environment and world. In life every state is together with other states, every event is in consecutive cohesion currency.

Head or skull does not instantly stop its functioning right after Sole, to be more exact, Potential Power of Body Energy leaves the body. The head is a center. Its work, function is very simple from one view, and is complicated from other view.

The memory is in the head, the center is there, connection with universes is there.

Natural death of creatures, of human happens when heart beats weaken and stop. *(Sometimes men say that "The Creator is in my heart, in my being". No, it is a wrong interpretation. If*

---

*the Creator, God, Allah was Housed in being of the creature that He Created, would not there be as many Creators, Gods, Allahs as number of men? Alive being is condemned to death, but the Creator is Eternal. But the Creator is Sole. The Creator is not Housed and cannot be Housed in being of creation. **“Every being created is housed in the Creator’s Being. It returns from the Creator’s Light Portion to the Creator’s Light, and joins his Creator”**).*

Every instant the Light Portion is spread from the Creator’s Space to all universes in portions, in particles. If the universes do not have a portion of the Creator’s Light Portion, the creation will not happen as well. Because, if every creation does not have Light Portion, it cannot be at scope of creature. Every live dies when the Light Portion released for him from the Creator’s Space is stopped.

Heart beats in human being, its beat is evidenced by pulse. The pulse is related to universes. The Light scope spread to the universes is Divine Light Scope. Our pulse beats in line with interruptedly spreading harmony of the Light Portion spread from the Creator’s Space.

Therefore, Angel of Death (*Azrael*) Comes to alive being at a time close to death. He Comes and Waits. That instant comes, he Waits stop of parts (quantums) of the Light Portion from the Creator’s Place which made that human’s body alive. That Light Portions stop, Angel of Death Takes to Eternity the Creation Light Portion (Soul Light) dedicated to that creature from prime. (Think, *human, He - is the Creator, He - is also*

---

*who takes to Eternity, He - is who Decides Creation and Eternity too.*

*Desire to perceive the Creator's Space, to join him while being alive runs in human's blood, is in his pulse. One beat of heart is originated by sending of the Creator's Light in portions, by flow of Light particles from the Creator's Space to universes every instant.*

*The Creator cannot be Housed in our Being, His Light is around us. The Creator is with us, but not in us. The Creator's Radiance particles are around us, so the Creator is with us, but not in us.*

*There is love in human's heart. It is undeniable. A man can love from the heart: He can love his Motherland, his parents, his beloved, his children, can become attached to things, to property, can love nature getting attached to beauties, to beings surrounding him.*

*But our Creator is in our consciousness, mind and memory.*

*When we die we do not return to our creator by means of our heart. The heart remains on the Earth planet. And we rise to our Creator by our mind and join him by our memory).*

When a live dies the heart stops functioning firstly, the head does not die completely for a while. As eye on the head of killed animal is connected with its head, it has died; but as the mind is functioning, the brain is seeing, therefore, the head has not died yet. The brain stops functioning at a time when that being has already departed to God.

---

The head, the brain of died creature is connected with universes, its head is connected with body and its body is connected with earth, that is, it is connected with materiality in materiality. It is a matter, - it is related to universes. The universes are related to the Creator. The Creator is Related to the universes, to every creation. We are related to Him, He is related to us, and we are related to that Creator again. As that living creature is related to the universes, its memory was centralized, was connected with the universes and to this space. Therefore, it should not be frightened before and after cutting.

That head is seeing, is hearing surroundings in its mind. He has raised, he is in interspace, and he is also interrogated, he is There. He is not waiting for help from anybody, He is in a solitary liability over There, but will be related to his body for a few days; therefore, he is here as well. He is related for forty days. The brain is growing pale, going out, turning its colour in the cage (*"the cage" - is the head*) between White and greyness. It has not decomposed yet. The body is decaying, decomposing, but the brain has shrunk, memory points have become compact, side brains have stopped, middle part of the brain has been centralized, related to universes. It is still looking for its body in Its relatedness from the universes. It was accepting White particle, grey particle and khaki particle by a slight flow from its body. Those White particles are still keeping the body. It is evenly related to the universes, to flow of the White particles in the universes. It is related to every being around, in that environment. It is among flow of the White particles in

---

those beings. The flow of those particles is in very small fractions. It is from the universes, in every being. The flow of those particles is related to that Creator, to His Radiance Light, to the particles of the Radiance Light in portions. If there is not that Radiance, - there is not the Light; If there is not the Light portion, - there is not a particle; if there is not a particle, there is not a creation, there is not those who will be created. That particle is from the Creators Radiance Portion, is from Himself, is from Prime.

Brain is a center in every living creature. Memory, Intellect and Mind are there to control the body. And That is related to the Creator. No matter if he is faithful or not, but it is related. Because He is the Creator, it is related to Himself. That Creator is aware of everybody's thought; No matter if they perceive the Creator or cannot perceive, He is aware. Because He is the Creator, He is Prime, is related to Prime Himself.

As there is flow of White, grey and khaki particles in body, it makes the heart to beat for the time being. {*Self of the Primary Creation's tint consisted of greyness (the colour of eternity), Whiteness (the colour of Light Allocated by the Creator to creation, that is a portion from His Radiance Light) and khaki (which has a colour tone between red and brown; Functional representative of the heat emitted at the moment of Great Explosion). These are the primery three components of Holy Cohesion and of the matter as well*}. In first instant of death those particles do not disappear moving away, though they calm down in that body, but do not disappear. The brain

---

has not died yet, it is connected with universes, with flow of particles in the universes. Though very quietly, but it makes up the call raising its last sound to the universes (*“sound” here - is the information given from brain itself*).

The sound stopped, breathless mind rose. The mind raised, the memory in the mind raised. With memory it gained a body, that body became mental. There was life in body as there was a soul. The body remained, the soul raised to an instant. Eternal being raised up to Eternity in that mental body. At an instant the soul, the mind in that soul, the memory in that mind, the intellect in that memory, the perpetrated deeds in the intellect are with every individual himself, and he himself is There. His Responsibility is from There, his Evolution is to There, he is in front of that being in White, he is to Him. That being in White is an executor of the Creator. He is not a Creator, but he is the executor of the Creator.

The Creator - is Forgiver, the Creator - is Merciful. It is the Creator who Can Make Dear. The concept of “Mercy” is not the same with the phrase “The Creator will Forgive me”. There is Mercy, so there is relief, easiness; there is relieving, so there is a Phrase “my creation is dear” of the Creator.

Head was cut, neck separated from body. It floundered, the body stretched, the muscles stretched, flow of White particles was ranged in one set, in one arrangement, and greyness and khakiness were ranged in one arrangement. The flow of White particles ranging in order did not come from head. The pain came, but flow of White particles did not come. There is not the

---

head on that cut body any more, and the White particles existing in the body came in arrangement. It separated from center, from brain, but the flow of White particles did not come.

Another variant is hanging of a creature by its nect. Body was hanged by neck, head was not separated from body. It was hanged, suffocated, remained hanged. It stopped again, is stopped sharply, carrying blood stopped in lungs, the flow between head and body stopped. The blood turned black, it became black, the flow of White particles moved away and became a stranger in that body. Khaki (*the colour of nourishing, energizing particles; these are also heat thermons*) remaining alone in brain, in being, became alone; blackness started ruling. Vertebra and skull are separate in joint connectivity. The flow from the skull to body is by tendons. The flow of White particles stopped in tendons single as string. Constant flow turned black and sharpened. Those who interfered in flow of the White Light, khaki particles, bound himself to the edge of boundaries of the universes. His Return will be slowly, it will get slowly to the boundary of redness, it will slowly reach Verdure, that is, the space of creation zone. The Perpetrator is also liable, - is liable for his stay amidst darkness. Because, it stopped flow of Red Blood, therefore, the constant motion of White creation particles.

Being cut is different from being suffocated. Inattentiveness in water is different from being suffocated. And suicide is different from intentional suffocation.

---

## The First Cultures on the Earth

The first Executors and builders of initial Epochs, of initial Combinations on the Earth were our 10 Holy Grands, who first came on the Earth planet, and afterwards comprehended Greatness, Singularity of the Great Creator. They built the first Cultures in different places of the Planet. These Combinations became more various because of human's reproduction and their spreading around. Nevertheless, some pieces, fragment of those Cultures has continued to the present day. As an example of one of the first Cultures Novruz (Zurvan) holiday can be cited.

Since our first Grand Man's ("Mən") epoch Navruz (Zurvan) has been brought to us in memories and has been celebrated as a solemn holiday. Navruz holiday is celebration of new day, of the life in whole, it is a holiday of recollection of a immutable instant – Creation of the Universes that concurs with March. That is, the meaning of this holiday is to remember the Instant of Creation of the Universes, specific Symmetric alignment of planets, start of their motion and beginning of newness.

Initial mankind used flame, fire or bonfire as a holiday attribute. Heat of the flame or bonfire indicates and reminds that the creations and our Earth space are within a heat. At the moment when the bonfire grows dim the neat and pure light of White Light collection of its center resembles the Great Creator's Light. That is, it means that the Instant of Creation is

---

spreading of the Creator's White Holy Light, Radiance to surroundings, start of the Primary from one Light and start of the Universe, galaxy and megagalaxies from White Light. On the eve of Zurvan holiday (*March 18- 22*) they used to bow at praying ceremonies to the Great Creator and to His Creations from Light 3 times a day during 4 days successively.

Primary men used to put different coloured small stones in whitened cinder that came out in the end of fire. Burst of the stones with a little noise coming together with this Whiteness was resemblance of creation of galaxies and planets by Explosion. Applauses and exclamations of people at that moments was joyful, excited execution of that attribute as well.

On the eve of Zurvan people used to gain water purity coming to the water's edge early in the morning and washing their face and hands, thereby they as though executed ceremony of joining the Purity, Prime and Holiness. Spring's awakening on the Earth space was celebrated with flowers and "samani" (/səmə`ni/-*germinated wheat*). It was a symbol of Green zone of the Universe, of green grass and life, and it was celebrated with joyiness and gladness of renewal by dressing in new clothes. Common tradition of the families, which included laying table, putting various meals and sweets, as well as dyed eggs on the table resembling again the oval, Ellipsoid shaped structure of the Universe and existence of life conditions on every nook of Its Green zone, strengthened families ever more. They also used to put on the table 7 kinds of things and eatable objects by names starting of "S" consonant. It used to symbolize and

---

increase unification of the Great Creator's Light and the families, generations, people with each other, the signs of their consolidation and friendly relations.

Every execution at that times was based on Science and Divine concepts.

Since very ancient times the people had passed on informations from memories to memories, from generations to generations by means of stories, bayatis (*a kind of Azerbaijani poem created by common people*), poems and other folklor forms.

At present this holiday is also celebrated not only on the Erath planet, but also in the Heavens, on the Sky, in the Universe. Even deceased men in our worlds known by most of people as "deads" celebrate this Holiday in the Heavens with great joyiness.

In spring thunder strucks and rains fall. As if the Creator's Radiance Light, that Explosion Instant and beginning of Purity are demonstrated to our eyes. If to see that instant from cosmos, from the Universe, if cosmonauts watch that instant from spacecraft, they will see that spreading lighth of that thunder at an instant forms the shape of oval, ellipsoid and goes out. This is a resemblance of the Prime, of the First Great Explosion.

This holiday was not the holiday of separate nation, race, continent or pole, it was the holiday of the all Creation, of the all creatures. On the eve of Zurvan heat covers at the same time the all planets in our Sun System, and they get renewed. Every creature, every matter experience holiday instant that day. In Azerbaijan Novruz is very old holiday. Its history has come

---

from primery human to us, and, therefore, reaches 3 – 4 billion years. In the sequel Information about this holiday was also brought to notice of representatives of other races, and during long centuries they also had been executing Zurvan attributes by the time when the ages made their deeds. It is a holiday instant of all mankind, of all bodies, of all creatures, of the planets Themselves, of their nuclei, because it is a holiday instant of the Universe.

Narrations about Novruz were thoroughly Covered in the Great Creator's "Creation" Book [3].

### **Short Review of the History of Linguistics on Investigation of Words**

Let us remind to the readers of ideas and views of different philosophers and scientists-linguists about relations between word and its meaning in the history of mankind.

As long ago as IV century B.C. in ancient China one of founders of religious views philosopher Confucius and his followers believed that the meaning of word had to fit the thing or action that it names; for example, they used to say that: "the road is called like this because we walk on it; the things are called like this because it is their essence".

Ancient Greek philosopher Heraklit (540-480s B.C.) told that there is solid connection between thing and word. Accor-

---

ding to him the essence of the thing becomes clear by the word being its name.

Greek philosopher Platon, who lived in the V-IV centuries B.C. in his book “About Cratylus or Correctness of Words” indicated that “in the world there are powers bigger than human, and they are who give names to things”. He also noted that “there is a consent, a tradition in denomination”. But he could not explain what that tradition consisted of.

Beginning from the III century B.C. philosophers and linguists of the Stoicks tried to prove that there is close connection between thing and its name. For this purpose they widely applied etymological researches.

But alongside with it, in old times the scientists of another front, especially Greek philosopher Democritus, Chinese philosopher Syun Kuan and others basing on bare mechanical-materialist philosophical views supposed that there is mutual consensus and agreement principle in denomination of things (*among people*), and thereby they founded the theory of “**conventionality-arbitrariness**” approved and believed heartily by linguists at present time, and which dominates up-to-date as well. The new age of studying of language and bringing it up to the level of modern science coincides with beginning of the XIX century, and during past 200 years under the conditions of domination of especially materialist views in Europe, different branches and sections of theoretical and applied linguistics has speedily developed, big army of linguists, various linguistic trends and schools have been created and functioned.

---

In spite of all these, in linguistics the principles of creation of words, unfortunately, have not been basically studied up to date, in contrary, its scientific-theoretical lines of development have been turned to wrong directions. For example, according to linguistic literature, as if, the words are made of pronunciation of phonemes not having any meaning-possession features in some ordered sequence, and these words gain their meaning just then. It could not be so, because, there is no place for such an idea in the nature. Effort of meaningless things to make a meaning together is ridiculous. All actions, events, elements of the nature are meaningful. If we cannot understand formulas written by mathematician, physician or engineer, can we call them “meaningless ideography”; or can we call the formulas meaningful, but their elements and symbols meaningless? For example, as the projects of machines and themselves are meaningful, their parts, actions of the parts are meaningful as well. The opinion about possession of no meaning by phonemes forming a word was so deeply rooted in linguistics that there have not been conducted any researches in contrary direction either in the past or at present. True, today phonetics and phonology problems in sphere of study of pronunciation issues are successfully investigated and experimented from physiological, acoustic and psychological points of view [2]; never-theless, as the saying is, “hammer is being hit not on red-hot iron, but on cold anvil”. But, all these works are done also for revealing the nature of words, and therefore, of language. If the meaning of words and the private

---

principles, content of language is not disclosed from within, then there is no sense in making the science just for science.

### **The Great Creator Created the Languages and the Words**

As we see from written in the “Word” part of the book and from the book “Mystery of Word, Mystery of Voice” [8], meaning-forming features and duties of phonemes have universality characteristics.

Vowel phonemes in the word are basically used for directing or aiming the movement of things or other events; but consonant phonemes express physical (*space, time-period, distance, direction, different influences, work, power, energy, their different states and quality of being relatively valuable, and etc.*), geometrical, psychological concepts, indications and events, and those concerning wildlife in words.

It is asked: if at present development level of science and technique modern man is not able to create new words, how could the people living in ancient times, the nations which was not enough informed about each other create words and languages having such universality and basing on concepts of exact, fundamental sciences? It is not so easy to answer this question, and the Great Creator come to our help with His Sacred Writing “Creation” [1]. In the II part of this Writing He Says the followings about human speech, talk and words:

---

**61. The Creation speaking Primarily from one root, the same way.**

After creating the Universe He Firstly Pronounced thrice the words **“It is Creation, It is Creation, It is Creation”** (*of course, He said it not in Azerbaijani, but in concrete Language belonging to common Universe, that is, to Himself, to beings in White and to Angels. It is interesting that 360 phonemes are used in the language of Heaven beings*). Denoting this Word, its root, that is, its creation principle and the words, languages used by people in His Writing called “Creation” He Continues His Words saying the followings:

62. The Words are Primary from Prime, the words are from one root, the word is with Me, with Self. The word from Prime is with Word, it is from one root, in one root, with Word. It is not Separate, it is with Self, it is with one root Word.

No nation created itself and its language by now [*at least, the nations have created compound words using previous (old) known words*]. Denoting this He Says:

63. Nation did not create a nation, nation did not create a language, the word from prime is with Me, with Myself, it is of one Root, of one Word, with Me, with Myself. The word from Prime, from Creation is with Word, it is of one root, the word in one root is with word. The All Creation from Prime is with Me, with Myself.

64. The word is with Word in one root, it is not separate, it is with Word, the “eye” that you see is with eye, the “word” that you say is with Word, it is of one Root, it is with Word.

---

He says in the III part of the Writing:

71. The word is with Me, with Self, the word from prime is with Word, it is in one Root, with Word. Speech is of one Root, with word. Among send beings (*First Holies who were our First Grands and their successors*) the word is with Word, is of one Root, with Word. The idea is in speech, in word, communication is with word, with word of one Root.

As we sow from current additional part, Firstly our 10 Holy Grandfathers (*they materialized on the Earth as a result of different influences, and had got bodies like ours*) and our 10 Grandmothers sent by the Great Creator for them came on the earth, afterwards they married and their children, their children's children were born (*thus, different races, different nations were generated on the Earth and finally we people increased*). Those children found each other and spoke to each other by the words on one Root, created and said basing on the same principles that we explain in this book, and therefore, nations and words increased, the languages were generated. The Great Creator Says the followings about it:

83. The first children came in that space, they came within the Great Creator's Look. The first children saw that space, they saw beings in that space, the beings were named. Language was called the "language", the name of one root was given by Primary Word (*to things, to beings*). A language was reproduced from language, the language was reproduced in communication, the word increased in communication.

---

86. They searched and found. Some of them were found, some of them met. Word came in word, and word came in words in that space. New word came from the first children too. Every thing, every being, every action was named, names came; new word came in One Rooted Conversation among Holies, new word came on that Root, a name was Called, the name came. The name came in look of the first children, and in self of beings.

These Holies, in whole all beings in White could speak and exchange information in the Universe both with the Great Creature and with each other since very Prime times, since First Creation. The Real People and other Heaven inmates are also of this kind. Though they had organs of hearing, they could sense sounds by some cells of their body too. Therefore, distant communication was conducted by soundless language, that is, by transfer of thought to each other, and close communication was conducted by sound-speech, sound language. That is, the speech, conversation existed in the Universe before creation of life on the Earth.

Thereby, revision of existing views on generation of the people and the languages is inevitable and unavoidable for mankind and science. Also the theory on “the role of persons of genius in creation of language” existing in science has to be considered from new look, from new point of view. Because highly developed Adam’s sons and other people with high Evolution level have been always Sent (*by way of birth as a relative*) from the Universe to the rangs of Human beings who

---

have had to Evolute since creation of life on the Earth till present time. Even if undergoing starvations, deprivations, even humiliations and death sometimes, they did not denied their assistance, their Light to these people's development like Prometheus and Dede Gorgud. Some of them played significant role in people's treatment, in prolongation of their life [for example, holy Prophet Jesus]. But these always were concealed from people as a secret. Because, the Earth Human had to pass Evolution way ever more and will pass it in the future as well.

**Fikrat RZAYEV, Vahid RZAYEV**

**Zer, Azer**

One of the important and irrefutable dates of the Earth is the worldwide Deluge which was informed about in Divine books, and had happened at Prophet Noah's period. As this analogous event did not happen frequently, successively, the people on the Earth had been informed about that Deluge in Divine books. In that information it was declared that Prophet Noah was the second grand of mankind on the Earth after Prophet Adam. Alongside with it, important information such as "Ashabul-Kahf" (seven Figures), Azeri Son, Prophet Ibrahim and other different information had been attracted in the texts.

But, alongside with it, the territory where Prophet Noah's family and the people who rescued from water during the Storm

---

had settled and lived, and historical name of that territory had been known to the people on the Earth.

In the legend “Bilgamis” it is stated that the name of our geographic territory at Prophet Noah's period (before the Storm and after the Storm) was “Ur”. It was noted in Ajdar Farzali's article “The Land of Inimitable Monuments” referring to “Bilgamis 1988, pg. 8, translated by Ismayil Valiyev”.

By the way, a lot of names related with “Ur” have been saved, remained and are being used. After that storm the people of that period not forgetting rescue and salvation by Prophet Noah, feeling gratitude towards Prophet Noah, started calling, entitling many places in Ur territory by His name. Alongside with it, the territory started being characterized as the territory saved from the Deluge by Prophet Noah: Nuh-chikhan (Noah's rescue place), Nuhchu-van (Noah's territory) and etc.

One of the interesting events is that after Noah's family and other people rescued from the storm, and the water started decreasing, local earthquakes started happening on the Earth.

The earthquakes brought new reliefs, new layers, rocks, heights, pits, landslips in our planet. Because, new life conditions, new changes were beginning on the Earth.

At the stages after the worldwide Deluge, at the period when the water were decreasing gradually, volcanic eruptions happened many times, successively on the Aghri Mountain located in that territory.

Renovation of the earth surface at that period was known in the territories as new spheres of Divine Light. These states were

---

also accompanied by earthquakes. One of those Light spheres was Nakhchivan territory in Azerbaijan.

One of the novelties on the earth, the fire rising, seeming, flaming from underground in many places of Azerbaijan, Absheron, especially in Nakhchivan territory, was called Atash (Ata – prime, leading, owner of Light; its pronunciation with “sh” / ʃ / ending had the meaning “turning of the light into heat”). The word “ata” was also accepted as a concept that did not change when being pronounced directly or contrary, remained unchanged (mirror effect), stable, and absolute.

“Atash” as the reason of all actions, beginnings and endless continuance, had the meaning of a concept having Light and heat, being Absolute. Burning mountain, the fire rising, shining from the ground was also called Atash-gah (Fire power).

After volcanic eruptions calmed down on the mountain to the west from Nakhchivan city, bright shine of the mountain seeming from Gami-gaya in Nakhchivan (on the west), vision of Light, fire provoked joy and interest in people of that period.

Those people had been using fire at the period before the storm. Vision of the fire seeming, shining at that time was not strange; the wonder was that, after those volcanic eruptions happening on Aghri-dagh that mountain was glittering with Gilded Light.

But those rescued families, those people had big difficulties in getting heat and fire at that time. And vision of Light, fire, its shining gave some gladness, happy news, salvation, some hope.

---

Because all mankind, all creatures, the Earth itself, its core located in the center had been created in need for Light, Atash (fire) and heat. Procreator Procreates everything in heat, with heat! (Mother is hot and child is hot).

There had to be a reason for rescue of those people and Noah's family in that territory. The fire flaming from underground, the fire, Light seeming on the mountain was a Present of the Universe, Look of the Universe to that territory.

The territory, the reason of rescue of the people of that period could be characterized as "Attention" by Light, heat towards that territory.

That presented light, brightness, fire was featuring that the Light should be declared as procreator, beginning of all periods after the storm, beginning of life, living. (Gilt is a portion, part of Light. It is a portion, part, Grain state of the Light being very bright, multisided, not stopping on movement trajectories, not colliding, not touching each other, having mass, but not having weight, not going in time, being in movement through the Universe, passing through all masses and creatures without obstacles and very speedy, and being key for creation of all creatures).

Those people going towards the mountain with joy and belief were looking with interest at the fire sparkling from underground, seeming at the bottom of the mountain. Owing to interest and necessity they started thinking of carrying that fire to their place, to Gami-gaya (they were still settled in mountains, on stones, rocks). After consultations and different discus-

---

sions they decided that it would be possible to carry that fire, that flame from the bottom of the mountain by kindling bonfires at some distance from each other.

The first bonfires were built, were kindled from Aghri-dagh to Gami-gaya. The fire was carried from one bonfire to another, the fire was kindled. And the first Priests were chosen to keep those bonfires kindling and to control them. They were serving for keeping fire, bonfires kindling. Thereby, the first fire, bonfire was directed towards Gamigaya by shortening the distance of fire (*in azeri*: “alov”), “yalov”, “halov”, by kindling bonfires.

Now night-times started being merry and interesting. The fact that the fire, flame, bonfires were displaying at night direction of the initial origin of fire – the Aghri-dagh mountain from long distance, was giving great belief and hope for future.

Those bonfires increasing, stretching from the bottoms of the Gami-gaya and Aghri-dagh grew, stretched, increased towards all large territories of Azerbaijan. Because the light of bonfires was lighting the big area, the large territory beginning from the bottoms of the Govv, Gavv, Gaff mountain from morning till night.

Starting from that time all happened events, that period, the name of that territory, the fact that beginning of God's Light, of spring was at the time of passing from Aires to Taurus constellation were engraved on all stones, rocks and mountains by flints in Zarvan (afterwards Zurvan, its contrary variant Novruz) territory, and that historical event was engraved, written by signs (initial symbols) and were saved in history so that to

---

inform future generations about it. Those first stone, rock inscriptions were not scattered writings, paintings, but were consecutive rock inscriptions. Because just stone was handy. It become the first chronicle inscription on the earth, and it become the start for chronicles that would be written during millenniaums.

Willingly or unwillingly, very interesting questions appear. One of those questions, very interest provoking, very puzzling moment is that, how the people of that period were shortening their hand and foot nails, whereas there were not any cutting, sawing, piercing metal instruments?

If hand and foot nails had not been shortened, it would not be possible neither to walk, nor to hold something by hands, or to grab. The people of that period used to gather canes in the water when the weather grew cool, polish them beating under stone, and did everyday works and other works by their means (it was sharper than steel cutter). They used boats made of cane for sailing on water basins too.

In the sequel the plain between Gami-qaya and Aghri-dagh seeming at a distance was called the plain of Arlar [Ərlər], Aranlar [Ərənlər] – (owners, owner of the territory, owners of fire, Light). Many times later, [ə] was pronounced as [a], the owners of the plain was called “Ar”, “Arlar” (Ars). As there is not [ə] letter in many alphabets, the word [Ərlər] was pronounced as [a] letter and was told as Arlar.

But indigenous name bearer, the word Ur - (the name of the territory before the storm), [Ər] which was added afterwards -

---

(then [ar], Light owner of that territory), Dur - (stand up, rise, it is time, the opinion, the word is yours) was name indicating both the territory, the owners in the territory and its character. As sum of them, the name was [Ur-ər-dur] - (Urardu).

But when those bonfires were burning, knowing that it is red, burning and aching, that mountain, that Fire were considered to be aching (not in negative meaning, but it was considered sacred saying “if you are ill-disposed – you will feel its ache” concerning this protected territory and these lights). Alongside with it, they concluded that this territory is also under God’s Gaze , God’s look.

But another truth is that at the following historical stages there was the last march of all commanders to Azerbaijan and especially to Nakhchivan territory, and fall stage of those military marches started.

If to follow the history chronologically undeniable truths will be revealed here. Unsuccessful outcome of the marches planned by commanders to other territories started from Azerbaijan, from Nakhchivan. And their failure started from their march to Nakhchivan. You cannot capture the Light Proprietor, because this territory - Azerbaijan has its Light Proprietor.

That Qaf (qov – *in Azerbaijani: turn out*), Aghri mountain is situated majestically in Azerbaijan territory, on the present geographic boundary of Nakhchivan (to the west) with Turkey.

As the fire rising from the bottom of the Aghri Mountain, from underground had been burning among stones during millenniums, during centuries, those stones, be it big or small

---

(not depending on their mass) had burned during long time and had become light, in Nakhchivan those stones were called "puff", "fuff", "tuff" stones.

They were called like this because they were light (in indirect meaning: they will fly like feather if to blow), they were called as the stones which were not applicable for construction, could not bear construction. One of additional names is "Foot stone", that is, burned, enlightened stone gathered from the foot, slope of the mountain.

It is said among the people in Nakhchivan that "tuffaghin daghilar", "tiffaghin daghilar" (literally: "your light load will collapse") this phrase does not have meaning of damnation at all, but means warning (it means "the work that you are going to do is vacuous, light; it does not worth to bear this load, don't deal with that vacuous, meaningless work, it will collapse").

At present time that Gaf, Aghri mountain is considered to be one of not sleeping, but "lumbering" volcanic mountains.

The Dagh (in English: mountain) title is bearer of strange meaning. That is "dagh" beats, burns, cauterize (in Azerbaijani: [**daghlamaq**]). Our language is so reach language at the size and scale of the Universe that our words are bearers of themselves and their meanings.

It is right that there had been created many tales, legends and myths about that Aghri mountain. According to the legend Prometheus was chained up on that Aghri mountain by Zeus, because he had stolen the Fire and had given it to people (again fire-light). And his brother Heracles went to the Aghri Mountain

---

to rescue his brother. On the way he passed through Kalkhida around the Black Sea and met Amazonians there. And then he continuing his way reached the Gaf Mountain, the Aghri Mountain, broke the chains and rescued his brother.

Because at all historical stages there had been crated tales, myths and legends about rescue on the Aghri, Qaf Mountain to declare that the people rescued during the storm around that mountain.

By innumerable military marches to Nakhchivan territory made on different “pretexts” the Light temples, fire temples, historical monuments, rock, stone inscriptions had been destroyed, the historical constructions had been ruined, there had been attempts to change many historical names and meaning bearers purposefully.

After the storm when the water started decreasing gradually Prophet Noah sent to different directions three of his sons and the persons selected among the rescued people. Together with each son he sent suitable for him persons who had belief in light, kindness. There was no purpose, those rescued people just were taking rescue and salvation from the Light territory, the rescue territory so that to make new life continue.

Each son was leaving his fatherland with its traditions, cultures, languages that had been talked before the storm, its linguistics, science and etc.

At the next period their grandchildren, great grandchildren spoke just in that language, in that syllable, word root. That language, linguistics originated from this territory, was the

---

Prophet Noah's, Zer (Gilt) language. (Even if they wanted to find, invent another completely new language in a short time after the world Flood, it would be impossible).

There could not be invented another, perfect language, linguistics, and there was not need in it at all. As language, linguistics is great and complex system a human is not able to change it from root any time he wants and by any manner he wants, and to systematize otherwise. (The ending of word, of idea can be changed, but its root is unchangeable).

Many times later those grandchildren returning from surrounding territories to their Fatherland, to the land of their Grand were speaking in that language, in that syllable as initially, they did not even need translation.

They were grand guests coming to the land of their Grand. As those guests had information about the territory, as if they had desire to meet again that Light, Salvation. This arrivals had meaning of gratitude for those Greatness by visit of the grave of their grand in Grand's land, Fatherland.

One of the most interesting cases was that, they were taking with them the Light portion from their grand's territory looking with great gratitude at salt in our territory, at the shining stones around. Those stones were sparkling when being collided (stroke) with each other! Those stones were called "chakhmaq dashi" ("flint stone") – "chakh" ("strike") meant "to beat on each other by blow, and "maq" - meant "shining, spreading Light, "strike" of Light".

---

Those sparkling stones in our territory and on the mountain slope were called “qovv”, “qavv”, and in the further periods “v” letter fell at pronunciation being pronounced as “f”, turned into Qaf mountain, Qaf territory, the territory sparkling with Lights, Spark, Light.

The territory was called Qaf-qal, and further Qafqaz (the Caucasus). With this concept and name the Qaf mountain had turned into the Qafqaz (Caucasus) mountain, the Qafqaz (Caucasus) chain of mountains.

Even in India at present happy days, holidays are celebrated by burning the “Bengal candles”, therefore, they mention the holiday with Gilt (Zer), with sparkling lights.

This execution comes from very ancient times. On the Earth, in states all holidays are celebrated with Fireworks, with sparkle of Light and Gilt (Zer) on the sky. Because the Gilt is the Light portion creating, generating sparkle, it is safety. Gilt, Light is not destructing, destroying, collapsing.

Many times later when making firearms, bearer of that name, “chakh-maq” (“flint”) was called as the main detail of that arm.

Calling those sparkles generated from that flint stone “gilt, bright sparkle”, having seen sparkling stones in our territory, the fires burning from underground, our territory had been called the Land of Fires (Ata-shlar), the Land of Lights.

As the fires rising from underground had been shining from underground during thousands of years in Azerbaijan, Abshe-

---

ron, Nakhchivan territory, our territory was called “the Land of Fires”.

But very timely question, interest occurs at this moment, because if the prime of this territory was with Gilt, with Light, was in surrounding of Light, what happened with these lights?

The most interesting and puzzling moment is that, in 1970s when the Soviet cosmonauts were conducting scientific expedition flights to the cosmos for the cosmic scientific investigations, the cosmonauts in the spacecraft looking with interest at the surface of the Earth from space (it is very interesting view indeed) observed just one area on the earth shining brightly. Looking at physical geographic map it was revealed that the shining territory was in Azerbaijan territory - it was Nakhchivan Autonomous Republic. After the flight that Soviet cosmonaut had came in Nakhchivan and contemplated this territory with great admiration.

If there is Light, it would not Disappear. That existing Light would not Turn down, it is impossible to “put out” that Light.

Among the people rescued from the storm, “Zer” (“Gilt”) had the meaning of luxury, bright cover, outwear of well-known, distinguished persons, their beauty, the thing worthy of king, padishah, “Bab” - leading, corresponding, orator, the person able to unite, leader, foremost, believed person, bearer of Belief, “Maq” - lighted, shining, spreading light, helping with light, having force, light power, and its opposite, “Qam” - the meaning of seven integer during generation of the Universe, sum of all concepts establishing seven, the colors, sounds

---

summed in seven, absolute, close, completing each other, “Priest, Priests” - controller, protector of fire, belief, light temple, common connection of seven integers, in seven sum, connection of seven in the meaning of earth with the Universe, that sacred Light, originated from Light and declaring generation feature, “Dur” - “durlar” (“durs”), further tour, to pass from tour to tour, from one stage to another, the border of spread of Light by stages, stage, bound, distance, protecting scope, boundary, support, wall, keeping the position and etc.

Those executors of this kind would never change their belief and faith. All zers, babs, maqs, qams, priests, durs and others were considered the members of Prophet Noah’s family.

They were Enlightened, bearers of Light, Believers in Light. Their another name was “Figures” – the persons distinguished among all, among most of people, not equaling everybody.

Azerbaijan, Nakhchivan were also called as Light bearers, Light proprietors. Zers, A-Zers, Azeris - we had not called ourselves like this, but we had been called this way by strangers who had come and seen. One of those names is “Tolerant”. Strangers kept looking at us, kept thinking that we treat strangers very attentively, we are hospitable, we share with everybody.

This is completely right view. We had not come from anywhere to this territory, but existed initially in this territory. And we accepted every stranger as a guest.

But on very ancient maps the Khazar (Caspian) Sea was called as the “Kirkan” Sea. At the following historical stages it

---

was called Haa-Zers (Haa - endless, continuing, interminable, unending Zers, enlightened people), and “h” fell and was replaced by “kh” (“x”), and was pronounced as Kha-Zar (Xə-Zər).

Saying Azer, it is implied that historical period, that territory and the people settled in that territory. Saying Azer-I, “I” is used as plural ending, expresses self, place of Azers.

On the physical-geographic maps, there does not exist any village, settlement, territory called “AzerI”, so the name Azer-I cannot belong to anybody, anywhere, any territory.

“I”- is directing, aiming. It is completer of name and bearer of function. It is plural ending, expresser of belonging. (the phrase “Azer-I is strange to us” used frequently these days, which cannot be interpreted, does not have historical root, is nothing but very needless, senseless, vacuous idea).

Because, during centuries in different territories related with Noah’s rescue on the Earth there had been built the cities, settlement areas called Zer, Azer, where architecture school and elements of Azerbaijan had been used.

Gilt (Zər) fell, fell in Gilt (Zer), fell from Light, Gilt (Zer), A-Zer fell on the territory! There fell the Gilt (Zer) being primary, generated from Light, being generator of Light!

After the worldwide Flood Prophet Noah’s family and the people who rescued from the storm could immortalize this territory, this geography as Salt Way, Silk Way, Gilt (Zer) and Light way.

---

We and our territory had been known and appreciated as territory of Zers, Babs, Maq, Qams, Durs, Priests. Therefore, it had been known that the land of Zer, Azer is the land of Azeris.

We are Gilt (Zer), we are from Gilt (Zer), we are with Azer, we are Azeri! We had not given these names ourselves, we had been called like this by others who had looked and seen us.

### **The Low of Timeless - Untimeliness...**

As far as we consider all States, all Consequences, all Structures, all Speeds and Motions, we see that they are in Unstoppable, Interminable Condition!

And there have to be reasons of such a structure of all these!

But what are and where are the reasons?

Referring on astronomy and astrophysics, Astronomy science has such a conclusion that the Universe exists during 15 billion years, our Sun System and the Earth – 4,5 billion years!

Astronomy has also such assertion that the light of the Stars that we see on the Sky at nights, detached from those Stars hundred thousand years ago, and that light of them reaches us just now!

This assertion is wrong fundamentally!

For the reason that the all Conditions, the all Speeds and Motions are within a Moment, they fit into a Moment Dimension!

Because whatever we see, any Object that we see, or the all Stars System that we see on the Sky at nights are in Timeless -

---

Untimeliness, in a Moment's Vision, so we see them in this Moment, in their Moment!

If to take as basis astronomers' assertion about that if the Light which once detached from those Stars, that Light, reaches the Earth just now, after hundred thousand years, if it reaches us now, and if we see that Light now, then Time-Period Rules in the Universe!

If Time-Period Rules in the Universe, then our appeal to God, Creator, Allah, our address to Him have to confine to Time-Period!

If we call for God, Creator, Allah today, at this moment, at present time as "My God, help me, my God, merci" – and if our appeal reaches "Him" after hundred thousand years, then why we should call Him and bother Him?

If my Call remains between heard and unheard after hundred thousand years (as it is impossible to live even 200 years), would there be any point in appealing to Him?

Every our Call, every Exclamation, every Desire every Thinking, every Complaint, every Concern, every Regret reaches Him, is known by Him in a Moment!

As "He" and the all Universe are in Timeless-Untimeliness, every our call reaches Him from Timeless-Untimeliness!

Because of very Simple Reason we can come to such Conclusion that everything occurs in Timeless-Untimeliness, in a Moment!

Death occurs in a Moment!

A stone falls Easily from Height in a Moment!

---

Joy – occurs in a Moment!

Good news comes in a Moment!

Speed and Stopping happen in a Moment!

Love comes in a Moment!

And Hate and Damn also occur in a Moment!

Belief and Suspect – in a Moment!

And True-Lie – in a Moment!..

Because all these happen in a Moment!

And every Moment is in Timeless-Untimeliness as well!

The Absolute Master of the Universe , “He”, Who is in Light, the Owner of Light , does not confine to Time and Period!

Eternity does not confine to Time-Period!

From which Time-Period had we come on the Earth?

We do not know!

In which Time-Period will we return to Eternity from the Earth?

We do not know too!

Because we had come from Timeless-Untimeliness, and we do not confine to Time and Period!

As the Absolute Master does not confine to Time-Period, his Creative, Generative Light Portion does not confine to Time-Period too!

Every instant we are in a New, Fresh World!

Any appeal, any Call addressed to the Universe is such a Light!

Light sees Light in an Instant!

---

Not earlier and not later!

Light sees Light in an Instant!

For this reason the texts of the all Sacred Books do not confine to Time-Period!

In spite of that, those Texts had been sent on the Earth thousand years ago!

If we read those Texts now, we will have such impression, it will seem to us, as if those Texts have been said right now, just a little time ago!

Because those Texts had been said from Timeless-Untimelessness, those Texts do not confine to Time and Period!

Every state, every Light Portion departs from any Mass, any Matter, any Particle in an instant, and is seen just in that Instant, in own Instant of Light!

It happens no earlier and no later.

The Light Portion Sparkles in its Instant and is Seen in its Instant!

If it was not like this, it would be pointless to show direction of the shore to ships during storm giving Light signal by Lighthouse from the Shore. If Lighthouses would not help ships to moor, then what sense would have those Lighthouses built on the shore?

If the Light Power detached from a Lighthouse would “Reach” those ships not in a moment, but after “thousand years”, then what significance would have that Lighthouse giving Light from shore?...

---

Cos every detaching Light Portion Detaches in its Moment,  
and Seems in its Moment!

Cos Creation of the Universes started, was generated from  
the Moment of Light Shine from the Great Explosion!

Don't think that Light is simple!

It is a Shining Light Portion!

It is seen, known in Instant, all over Universe in its Moment!

All beginnings are from Light, It is from Light Portion of the  
Great Explosion!

Those detaching from Light, from White Light, is Light too  
(Spectral Colors), it is Unstopping, Interminable, Propagating,  
Generating, it is Generator of Color Variety in Colors!

Don't think that the Universe is simple, it is in Instant, It is a  
Carrier of Light in a Moment!

Don't think that Word is simple!

The Word is in Instant too, it is Light Carrier too. The Word  
is heard in a Moment all over the Universe!

Don't think that Thought is simple!

Every Thought Turns into Light Frequency, it is Known in a  
Moment all over the Universe!

Don't think that Desire is simple!

Every Desire is in an Instant!

Every Desire spreads in the Universe in a Moment!

All Desires are Analyzed, Known, Heard in the Universe!

There are Desires that Help us!

Good Desires are Accepted!

There are Desires that are Bad!

---

They are Analyzed, are not Accepted, return to ourselves, and Bring to us just “Pains”!

Every State is Unstoppable, Inseparable from each other, is with Light, in a Moment!

### **The Second Life Starting from Aries**

What happened on the Earth on the eve of the worldwide storm?

Earth core was activated to such an extent that all masses in deep layers of the earth and on the earth were in roughness. As a result of that roughness waters, water basins were waving in accordance with the core activity.

The reason of all those was horrible roaring sound that was heard along the all globe beginning from its core. It was like the earth was in revolt, was revolting.

That sound frequency speed was very strong, therefore, water was waving; it made waters to move. Ground was cracking, the stones were getting shattered. That Earth perturbation occurred within a moment was very terrible.

As a result of this Earth perturbation the people of that period remaining among water waves and Earth perturbation were reaching out for heights, mountains, rocks seeming around. Different objects, pieces, woods brought by water waves were helping to people to rescue in water, from water (it is interesting state that most animals can swim. But human learns swimming by helping means. At present situation, if

---

there is some billion of people in the world just a little part of them can swim. Majority consider that swimming is difficult).

Those people in water were making effort to rescue struggling hardly against water, waves, moving towards mountains, rocks, stones. Those seeming stones and rocks were giving them hope for rescue, belief in salvation. They were making effort, were helping each-other, were rescuing hardly from water on those stones, those rocks. After the storm calmed down they called those rocks, those stones Gam-gaya, power rock, and rescue rock, saved in history in their memories.

Generally in ancient times, and even in the XIX century “gam” expression was used in fiction literature. “Gam” - meant power, collecting together, assembling, and using force. That is, in very subsequent historical periods they used to say in spring time: “Gam vakhtidir, torpaghi gamlamak vakhtidir, gam surmak vakhtidir” (*it is time for “gam”, to “gam” the soil, to drive “gam”*).

That is, one meaning of “gam” was “we rescued together” making effort, using power against waves. Therefore, those people remembered that they assembled in the area, territory where they rescued by power – by “gam”.

In spring, during sowing, tillage time they used an expression “Making “gam”, ploughing the soil starts with Calf”. And it had very big reason. The reason was that the people of that period were aware of Constellation moving (traversing) on the sky, and their names existed as well.

---

But after the Deluge the name meaning of those constellations started changing too. Existing constellations were called, arranged in conformity with that period, in conformity with events, and turned into bearers of the first Earth calendar.

That is, during spring when the sun was passing from Aries to Taurus constellation (according to present calendar the period from the 18<sup>th</sup> of February to 18<sup>th</sup> of March; it was characterized as the eve of storm and the time of stop of the storm. It was memory of restart of life, its renovation, renewal).

From this period beginning of sunny days on the sky, heating of weather and ground was bringing new life.

In sunny days the clouds massed, started moving, deceased were prayed for, alive people become more friendly to each other. Tenderness between those people returned again, come back again.

After the storm the graves were dug for those who could not rescue. The places were assigned for the first graves and graveyards. Those graveyards were considered the bearers of meaning, memory.

As during the storm surrounding mountains and rocks had been considered the stone of hope and rescue, the first grave stones were chosen high and narrow with the meaning that “they rose up to heights”. On those stones the days during the storm were engraved by means of tinder, steel (epitaph – gravestone inscriptions).

Funerals were executed by digging graves as initially.

---

As initially, as continuation of that memory bearer, they saved the memory that as human and other creatures come to this world from “covered” world, they have to leave this world being covered. Not depending on human’s status in the world, it was considered as result of attentive and tender attitude towards that human.

It was unacceptable if any creature leaving this world remained uncovered. Tender attitude towards a human, a creature by a human was not human’s particularity, but was human’s concern (particularity and concern are differing).

Those marked stones on graves (many times later they were called “gravestone”), initial graves were dug in direction of sunrise at daybreak, during Ush time. They were being buried saying “You joined the Light, and we all will join that light”.

Those graveyards and gravestones, therewith, did not have meaning of the fated ending, but meant that human is a high creature and he will join heights.

Inside and bottom of the grave there used to be covered densely with stones. It did not have reason, but had meaning; it meant that humans rescued from water on stones and rocks.

Another reason was not to allow injuries, wounds got by many of deadmen during the storm, and their possible illnesses (their different types) to leak, to pass from grave to memory of soil.

To prevent rain waters pouring during the period after funeral, leaking through the surface of ground and getting

---

memory of those bodies (results of biologic processes going in those bodies), to join underground waters.

Underground waters, underground rivers are very complex system. Those underground rivers under deep layers reach equator of the Earth very speedy, accumulate there and spread from there between two Poles, renovating rocks and layers. At the same time they are strong water currents flowing incessantly towards equator between two poles.

To prevent that “memory” bearer (also “those states”) to come up the surface of earth by means of those springs, underground reservoirs, rivers. So that the soil, plants, water did not turn into “bearer of those states”. And not to allow alive creatures “bear” that memory using that food and water. Those conditions were not a rule, but were considered as possible results.

Among the people who rescued from the storm the Prophet Noah looking on the sky said: “The people rescued in this territory. Look, the Sun, wind, clouds, rains, waters, hails do not have territory. They move along the earth, divide, share unity with all alive creatures. Because they come from all sides of the Earth, spread to all sides of the earth, they do not have their territory, they reach all territories, and nothing obstructs them”.

He could create rooted belief in tenderness, in gratitude for environment, to the sky among the people. Many times later the people were gazing at the dome of the sky calling it Kahkashan ([kəhkəʃan]), and the constellations – Kashana ([kahkaʃan]).

---

The first graves after the storm were not characterized just as cemeteries. Those graves turned into bearers of meaning, of memory. High, narrow stones placed on the graves had the meaning to resemble future people and brought generations that during the storm the people assembled on rocks, stones.

They resisted, withstand the storm, rescued on the stones and human generation continued (if during the storm there was another means for rescue, supposedly, they would save in history, in memory that means, and it would be inevitable to be saved in history).

But before the Deluge mankind living on the Earth were both marrying and leaving this world. Before the storm the people living this world were approached with thought “He (she) joined his (her) prime”, and the grave were marked with family, generation symbols, with different marks.

The character, behavior of that human, his position among people were symbolized with introduction marks, “stamps”. Alongside with those stamps there were signs, notes by drawing with different natural colors.

Signs (stamps) on pottery (faience, clay pots, things) and on other such products were made to indicate whom that product belonged to, whom it had been made by, as well as, which generation it belonged to. Those marks, symbols, ornaments were indicator of generation (clan).

Those marks, stamps being recognition signs of the people and generations of that period among them, informed of their character, behavior and achieved status. Afterwards those

---

marks, symbols, stamps come to form of flag and attribute. The people who rescued after the storm were also engraving their generation marks, stamps on stones and rocks. Alongside with it, among the most important marks, imprinting of the Ram (Aries), the Bull (Taurus) denoted that the Storm happened at the period passing from Aries constellation to Taurus.

Alongside with those notes, those marks, in stone inscriptions there were also imprinted the letters used at that period. It would be “stone memory” – stable alphabet in memory turned into stones of the generations that will be brought in the future. After the storm this territory was called a cradle of mankind. The paintings of horned ram and calf engraved on stones in many territories at the historical stages after that period indicated that the life on the Earth started for the second time at this “period”, after the Deluge. These signs had been memory for all mankind.

Those people were saving in memory many conditions. The greatest memory was considered to be the memory of water. Because memory saved in water resembled to those people again that “we should be tender to water. Because we rescued from water by water, our desires, our thoughts saved us; every word, every thought told to water spreads among waters; don't tell the water your sorrow, your anguish, your ailment – water will return it to you. Tell the water your tenderness, your desires, your expectancy, your joy, tell the water what you cannot find - the waters will walk about waters and will bring

---

you help. Keep water dear, consider it dear; water is life, it is your life - keep your life dear”.

Strange to say, water is memory bearer of the earth, and the blood is memory bearer of human. They both are liquids. Water and blood both flow. They bear memory states. It is blood that makes heart to function. (heart as an internal organ doesn't make blood to move, but blood flowing strongly makes the atrium-ventricle of heart to function).

At this period there was one more address from Prophet Noah to people, and it was address of gratitude. Prophet Noah used to say to those people “Let's be thankful to the Sun, to water and to the soil. They help human generation, give them life”.

The soil became your rescuer from water with the light over your head. The soil became dear, it became your rescuer. If we have to struggle against torture, there would be a stone in your palm, the ground under your feet, and the light over your head.

Be honest and fair – your salvation is in it. Before starting any work think “what will be result of it, what will be the ending”.

He had one advice to his sons and to the people accompanying them traveling to long distance “knead in your palm a pinch of salt, a pinch of soil and a bit water, roll them, make them fellow traveler for you, they will be your helpers during the way.

If you face difficulty, disrespect, stop and hit the soil, the ground with your right foot. “It” will know – the ground will

---

know, you will say then. Call the sky, the heavens, be sure, you will be heard then”.

In the end of these commentaries there was said “Be sure, it will not be wrong. Addresses to God cannot be mistaken, be sure that God would not accept mistakes. Be sure that God would not tell wrong. And you be sure in your appeals, so that there cannot be done wrong to Him”.

At the following historical periods in the word /əmin/ (sure) the letter /ə/ was replaced by the letter /a/. It started sounding as “Amin” in the language of people.

Tanri (God) – know that Tanri, know yourself; you will know yourself to that extent that you know Tanri. Be sure of it.

**You are that Great Source, and that Great Source is in You...**

If everything that you see, you know, you read, you touch, you feel, you taste, you hear (sound); your night, your daytime, light, the sky, heaven, stars are real, which reality else are you looking for among these realities, O Human?

Are there realities other than those, Could there be, O Human?

No matter we want or not, no matter we accept or not, They will not be strangers, and they will not change and be different!

Because each of them is a Source separately! And there is a lot of Sources worth to refer among those “Sources”!

---

It is a wonder that during recent years one word has been very Popular, very Actual!

One question is put in front of any written text: "What is the source?". A written text is a Source already!

Because among above mentioned Sources these are a Source too!

And the Source is among what we See, what we want to Know!

Another strange question is Popular too!

And this question is: "Which literature has been used?".

Then the question becomes stranger!

That is, one thought is hidden behind Rows, behind Words, behind Curtain: "which author's thoughts have you used?".

They are more interested in a number of used literature, names of Authors, words, quotation of an author, "Quotations" used from them!

If to say more gently, they are interested not in the Essence of the written text, but in thoughts of those authors which had been placed in the written subjects and texts, in articles, books, source of the text!

And these are called by a word "Source", they require Source!

Interesting question appears!

Human Himself, his Body, Temperature, Movement dynamics, his Look, Breath, Temperature levels are great Sources, but he is unaware of himself!

---

Human is unaware of himself, of Working principle of his Body!

In this condition, it is a wonder that he does not seek for anatomic-biologic reasons in Himself, in his Source!

Human, Living creature, Mass, Body, Creation are among all temperature levels and sequence!

And where are these Temperature levels taken from?

Where does Human get Temperature level?

Though Human, Living creature does not keep source of heat, heat apparatus, heat accumulator under his bosom, in shoulder, in pocket – his soul, his body is bearer of heat!

Why do Human, Creature, Plants, Masses have to be Heat bearers among temperature levels?

What regulates temperature levels in body?

Is temperature level result of feeding, metabolism?

Human, Living organism holds away himself, limits his Water, Food for a long time in extreme situation and anytime he wants!

In this condition his body temperature does not change, stays stable, that is, 36, - 36,5°C body temperature level does not change!

Then, in this case, it is not metabolism, variety of food that regulated temperature level!

So what does it?

Human, Living organism can live without food and water for a while!

---

But, if Human does not have Stable Temperature level, his Existence is impossible!

This is the biggest, interesting “Source” ought to know!

And the Source is not far, but in Yourself!

So, we do not seek for the reason of occurrence of this condition and do not ask each other saying “What is the Source”!

Because the Source is in Ourselves!

In Human Body, Soul the Temperature level is kept by metabolism, food, feeding!

But, each of them separately is different, autonomous Temperature Bearers! (that is, potato is bearer of cold, Coldness, Bread is bearer of Heat, Grains are also bearers of Heat, Water is bearer of Cold and etc.). Though foods are bearers of different temperature and we use simultaneously those different temperature bearers in foods, we keep our stable temperature level  $36,5^{\circ}\text{C}$  - different Foods cannot change temperature level of our body, subordinate it, and create frequently changing Temperature levels!

So, what mechanics in us regulates Stable temperature level, and why does not this Temperature level change?

And the Source is Ourselves, in Ourselves!

This structure is made so Simple that we can do nothing but being surprised! Lets’ look just at a Human for the present!

Human increases his Temperature level breathing in (in all seasons), and regulates his body temperature, “Cools” it breathing out!

---

Breath is provided to be very important factor!

When we eat hot food, for example, hot tea, hot coffee, hot boiled milk (having 60-70°C temperature level), our body temperature does not increase as a result of it!

When we eat hot liquid meal (it can be 60-70°C too), our temperature level does not change again!

In summer Human drinks cold, very cold water, even eats frozen ice, but stomach does not be disturbed because of it!

And our temperature level does not rise up to 50-60°C, or under influence of that cold water our temperature level does not drop down to 1-2°C!

In hot summer and in cold winter, in the North or South pole Human does not change his Stable Temperature level!

What keeps that Stable Temperature level?

If our Breath stabilizes Temperature of our body, then what regulates temperature levels of food that we eat?

When we eat hot or cold foods our diaphragm regulates that temperature level for Stomach!

(Diaphragm – is anatomic organ located between Heart, Lungs and Stomach and Intestine, and separating them from each other).

Diaphragm instantly regulates 8-10°C to different temperature levels of those foods when food enters stomach, because of this simple reason Human's stomach does not be disturbed!

When Human becomes sad or starts being tired, Diaphragm is squeezed upwards towards Heart and Lungs!

---

In that condition Human breathes fast, tries to extract breath from himself!

When Human is joyful, is happy, Diaphragm stays stable, as if, it becomes “joyful” too, and Human breathes calmly and smoothly!

Look and see, how simple this Anatomic Biological Structure is!

The Temperature level of a creature is Regulated by one Breath!

Sportsmen, usually boxers, wrestlers and others during training and competitions, in the ring or tatami, in the stadiums sweat and start getting tired in a short time!

Because, frequent breathing rises inner Temperature level (in that case because of amount of air breathed in fast)!

And when we keep breath inside, we breathe out so that temperature level of blood did not rise, so we regulate Temperature level!

And between rounds trainers try to cool those sportsmen’s body temperature spraying cold water, and by means of ice pieces!

Note that it is Breath what regulates temperature levels for all living creatures!

And when we eat food, that is Diaphragm what regulates inner temperature level!

If these regulation cases would not exist (the Breath, the Diaphragm, and the Blood), if the Breath, the Temperature levels, the Stomach, and the Blood would not “accompany”

---

Human, Living creature from very birth till his last day, then how we – Leaving creatures could be, could exist?

Our body would Heat excessively, or would Cool excessively, and our Stomachs would be disturbed of Food Temperatures, or would catch cold and stop because of Cold Foods!

And this is a Source, the Source is in you, You are a Source!

Are we aware of working principle of our body, the body of all Leaving creatures?

Where should we look for another Source?

The Universe itself is a Source too!

Our Knowledge, our Researches, our Investigations, our Interests – these are the Sources!

**Note:**

It is interesting and strange!

Organisms of all Humans, of all Humanity are identical!

That is, what Identity do they have?

Human feeling acute pain and acute ache uninterruptedly breathes fast, by short intervals, dives breath out of himself!

Why, and what happens in body, that Human tries calming, neutralizing this condition at that moment by his subconscious memory?

At that moment amount of Bitter and Sour increases in body dramatically!

At that time Human breathing fast and by short intervals, tries increase amount of Sweet in his body!

He tries to restore it among Bitter and Sour!

Or, at the moment he starts crying loudly because of pain!

---

In this case, during body traumas, injuries, wounds occurring instantly, human being frightened cries loudly, and by this method he reduces Bitter and Sour amount instantly accumulated inside the body, and uses this condition intending to increase amount of Sweet among them.

The animal world is like this too!

When aching, being tired, being scared it tries to “neutralize” this condition by its Breath, breathing shortly, fast!

If to think very deeply, we get in very strange condition!

The Source is Human!

And the Sources are for Human!

And Human himself is among the Sources!

Saying “Source”, saying “In Me”, looking for the “Sources” how unaware of ourselves we are!...

How simple is anatomical-biological-physiological constitution of Human, his Temperature levels!

Therefore, we should not be depressed, but we should be in Calm, Cozy, Even Surrounding!

But this second matter of Calm, Cozy, Even, alas, is a bit difficult!

Otherwise, it would be so easy to Live!...

It is very strange and as much interesting and causing to think!

Here is an example to think!

A Chicken leaving liquid and solution environment, that is, getting out of the egg, Breathes and Voices at the same instant!

---

There is no remainder of liquid and solution in its Nose and Lungs!

If there was any liquid and solution remaining in its Nose and Lungs, Alive Chicken would not be able to make his First breath!

It would not be able even to utter its first Voice!

Remainder of liquid or solution in its breathing passages, probably, would cause its suffocation!

Birth of Human is similar Process as well!

A Baby leaving Mother's body, her being (being born) by his first Cry (Clear Nose, Lungs, Breathing passages) the first air mass gets in his Lungs without obstruction, and at that moment there is no need in additional intervention of Obstetrician, Gynecologist doctor being around!

That Baby's first "Cry", the first Air Mass filling his Lungs is one of the Prime Reasons of his Existence!

The body can be the first Regulator of the Temperature Level!

It is a wonder that Humans are also carriers of the Positive and Negative Temperature!

Persons walking by middle speed, a bit fast indicate that their Organism is carrier of Cold!

Persons walking by middle speed, slowly, low speed, are carriers of Hot!

Human walking and moving fast breathes fast while walking as well!

---

Breathing fast he tries to keep stable amount of “Hot” in his body (this condition is mechanical function of “Subconscious Memory”).

Human moving slowly, not hurrying tries to keep evenness of his breath, so that the temperature within the body would not rise.

When they raise their speed, they start sweating immediately (Subconscious Memory functions here as well).

A man climbing on slope, and a Man climbing up by stairs begins being tired rapidly, he gasps for Breath!.

In this condition as he Breathes fast, the Temperature level within the body starts rising!

But when we go downwards, down the stairs, we do not feel any confusion!

When climbing up, to the height, Diaphragm, is squeezed up, in this condition the Breath rises inner temperature level!

When we go downwards, Diaphragm remains stable!

We Breath out just in free condition!.

These are the Reasons!

Another strange trait is that, smoking man also grasps for breath, starts being tired!

Because, Temperature level of the light on the end of the cigarette reaches 500-600°C at every inhaling! (Though meat is gradually roasted on the coal and made kebab at 500-600°C!).

In this case also smoke inhaled in Lungs, big hot mass rises Temperature level within the body!

---

Then Phlegm in Diaphragm and in Lungs, Bronchial tubes tries to Regulate that high smoke temperature, lowering it down to 8-10°C, that is why Breath of smoking man is always loaded and heavy!

Most likely, it would be better if he did not smoke!

“Breathing” is an important factor!

When breathing in, the Temperature level within the body rises! When we breath out, the Temperature level within the body Cools down!

While no Living Creature does not bear any Heat “Source” in his Shoulder, in his Armpit, in his Pocket, amount of Heat within the Body fixed for humans at the level of 36-36,5°C does not change, always remains Stable, within that Temperature level!

When breathing in, positive Temperature level is created, but when breathing out, the Temperature level within the body is cooled down, and Temperature Levels are Regulated!

### **By Portions, by Parts**

Every condition is by quanta, by parts. Human also eats by quanta, by parts. He swallows the food by quanta, by parts. But he lives his life in a single portion, single part, and it is not by quanta, by parts.

Our heart beats by quanta, by parts. Body, internals, thoughts are by quanta, by parts. His breath, his speech, his pronunciation is by parts.

---

Machine mechanisms are in pieces, in parts. A building is built by quanta, by parts. A fate portion is allotted from the Universe separately, by parts for every creature.

### **Salvation with Excellency Noah and the Territory**

In the historical sources Azerbaijan and Nakhchivan situated between the east and the west took unique place in the works of many historians and analysts.

Nakhchivan situated between the east and the west was renowned, become famous and attracted attention both with its territory and historical stages and its historical figures.

Azerbaijan and Nakhchivan territory lingered in minds and in history also as the land of Light, Fire.

Saying light, fire, it had the meaning of hope, motive, regulator, making capacity by equalizing, dividing, multiplication (bringing to result), making distance, color division, equalizing the temperature (spectral) limits, creator and etc.

Primary people who had settled down in Nakhchivan territory had sedentary life, and realized that the Light concept was the initial start of creative work.

Comprehending that their territory and they themselves are the bearers of Light, they were not violating creative Light conditions and were saving them.

This concept, this behavior protecting their territory and people, alongside with it, involved them to creativity, thinking, making to think.

---

All these being bearer of the primay reason, also meant salvation and being saved.

There is the storm of Excellency Noah's period in history. At the following stage there is Excellency Noah's salvation and rescue in that territory between Gami-gaya, Aghri Mountain.

Very ancient history was divided into two stages. cultures of the stage before Noah's Storm, Excellency Noah's period and the period after that stage.

Very puzzling moment is: what was the reason of that storm which happened on the whole surface of the Earth, and what was the reason of salvation of the Prophet Noah and the people living in that territory during the storm?

The Prophet Noah's rescue from that storm at the same time was his rescue by that territory.

The Prophet Noah's Flood, that reached us by means of history, divine Books, being memory of salvation is very important historical fact.

Nakhchivan territory and people rescued from that horrible Storm which reached us through history.

Because in that territory the people used to call Light, Tengri, Tangri, Tanri both before the storm and after the storm.

But the heaviest moment was that, alongside with highness and sound of mountains heavy rain pouring uninterruptedly from darkened cloud was more terrible.

Disappearance of the sun from sight created such expression that salvation was impossible. The people terrified were looking for sunlight, direction of the sun on the sky.

---

The hope and salvation was in territory and in Light among darkness. The call was towards Tengri and Light.

The storm, continuous rain made to loss count of days.

Gradual lighting of the sky, abating of storm and rain was creating greater belief in salvation.

The people's salvation was in the Sun among dark clouds, in that Light.

But absence of Light among rain pouring uninterruptedly from dark clouds and water waves was more fearful and terrible. It was like the "last day, last night".

Lighting of the sky, movement of the clouds away, appearance of the sunlight when the storm and rain started abating gradually was bringing great hope for salvation.

At the following stages that rescued people considered the Sun the symbol of the people's salvation, remembering their cries and shouts during the storm, remembering the Sun at the moment of cessation of the storm, celebrating appearance of Light with joy and dance.

(On K.Brullov's painting canvas entitled "Pompei's Last Night" hopelessness of human was described).

Call of Light, call of sunlight and salvation with that call in that territory leaving its deeper mark in memory of the people who rescued together with the Prophet Noah's family turned into significant event.

At the following stages the Light remained in memories as start and salvation, and Tanri (God) – as a protector, savior.

---

Prophet Noah's family and the people of that period declaring that territory, that geography, that nation, language, that period, that nationality, those traditions, also rescued having leading (dominant) function, calling those people to the Universe, to sciences, declared again that "the people are part of the Universe and Creation", and its integral part.

Prophet Noah's family and the people of that period could rescue during the Storm between the Gami-gaya and Aghri mountains. That territory had its geographic name before the storm. At the following historical periods this territory turned into bearer of many new names related with Prophet Noah's name.

In the further periods the people started expressing that salvation moment, help moment and start with sunlight with dynamic dances symbolizing gratitude to the sun.

Stay on semicircle indicated that the dancers stay in front of sunlight and the sun. And at night they called the light symbolizing the sun "yalov", "halov", "alov" (fire) and saved it in mind.

In further historical periods that performance was called Yalli (*name of national dance*).

Yalli as the first dynamic dance of fun at the periods after Prophet Noah's storm belongs to the territory called Nuhashan (Nurashan) between the mountains Gami-gaya and Aghri-dagh.

Yalli as a genre was not brought in Nakhchivan territory from aside. Making Yalli is performance of salvation and fun expressing that historical event, its history is very old.

---

Our grandfathers and fathers always making Yalli at wedding ceremonies by all means, firing torches celebrated salvation in that territory, looked at light with gratitude and hope.

Yalli dancing groups performed Yalli wearing in red and the leader dancer going first in the dancing line held red kerchief in his hand. Red expresses light, heat.

Yalli genre is performed with zurna (*national musical instrument*) being wind instrument.

Zurna, attendant zurna and drum accompany Yalli dancers.

Musical instrument Zurna is leading by its sounding timbre and call all musical instruments to the same high sound order.

Musical instrument Zurna being the leading sound is also a bearer of the territory name such as Zurvan, Zangazur, Astazur and etc.

Even if that Zurna sounds from distance, its sound frequency, sound timber does not change depending on distance. It keeps unchanged the same sound timber. It calls, hails, awakes, makes to think, elevates.

Musical sound of Zurna is call to fortitude, courage, heroism, to sticking out chest against torments, self-affirmation, declaring secrets, finding rescue and hope among darkness.

That musical instrument is a tender eulogizer of the sound of the universe.

The people of that period remained bearers of belief both before the storm and after the storm. They knew that light is creator and reproducer.

---

Heat is reproduced from that light, fire (“yalov”, “halov”, “alov”) is reproduced from that heat. The fire, the heat is required and always will be required by all creatures, masses, things, all mankind.

The universes also were created in need for that Absolute Light, heat.

If there is not the Sun, there would not be heat on the Earth. If there is not light, there would not be heat. If there is not heat there would not be movement, planting, reaping and there would not be results. There would not be human, living creatures. These were one of the reasons of salvation of the people of that period.

Urfani Yalli dance: Ur-mi (three directions), ur-va (amount of flour used making lavash (*lavash – bread baked of the thinly rolled dough*)). That urfa is bearer of the function of collection with each other.

Urfani territory in yalli is bearer of unity concept, of fun.

All above stated, the fact that the venerable tar player (*tar – an Azerbaijani stringed folk musical instrument*) Akram Mammadli’s son Kanan Mammadli collected our Yallis and recorded them by notes, is very great historical event.

Nakhchivan territory itself is very interesting territory.

There is interest provoking lake in Nakhchivan territory.

That lake is situated at the distance of 80 km from Nakhchivan city, to the North-East, on the Zangazur chain of the Lesser Caucasus mountains, in the territory of Shahbuz near Batabat.

---

There is a lake in summer pasture in mountains near the spring Zor-bulag.

Water of Zor-bulag does not flow in that lake.

The interesting moment is that the natural lake (with medium water capacity) situated near Zor-bulag is of oval (ellipsoid) type.

That lake of oval type is complete indicator of the time of sunrise and sunset.

The island moving continually in the lake indicates time of movement of the Earth around the Sun.

That island moving in the lake (it is of ellipsoid type) moves along the line dividing the oval into two equal parts lengthwise from the South to the North. Structure of the lake points at the South and the North.

Before sunrise the island stays on the south shore of the lake.

After sunrise, during the day that island moves from the South shore to the North shore along a straight line.

It is interesting that from the moment of sunrise to the time of sunset the island reaches the North shore.

The moving island completes the distance overcome by the Sun during a day on the Northern shore.

Though the sun sets, during night that island continuously moves towards the Southern shore and meets the morning sun on the southern shore of the lake.

That is, though the sun passed to another hemisphere, the island accompanies movement of the Sun synchronously.

---

With this movement that island in the lake never changes its movement speed, unmistakably “notes” fall of sunlight on the Earth (in spite of that the weather is cloudy or it is winter), and angular movement of the Earth around the sun.

The history of this lake (of medium water capacity) is very-very old.

The island in the lake turns into indicator of the height angle, movement angle of the sun with respect to the Earth, its division by degrees.

It shows movement trajectory of the sun.

That lake, that island from Nakhchivan territory accompanies the sun with gratitude and joy.

Another interesting gem of architecture in Nakhchivan city is the tomb of Momina-Khatun constructed on the rock chain.

The tomb consists of ten inscriptions. That grandiose tomb was constructed on one support. Ten inscriptions of that tomb are bearers of deep meaning. That is, the morning sun rising (from the East) lightens one of the inscriptions, and sunset completes the day lightening the same inscription on the West.

Abubakr Ajami Nakhchivani constructed the tomb of Momina-Khatun on a sacred mountain chain.

That mountain chain has holiness, protector and rescuer features.

The mountain chain starts upwards from present Khal-Khal forest from the north-east. Passing through Nakhchivan city it goes down in the direction of Ashabul-Kahf (seven figures) of Nehram village near the Araz River.

---

Many water springs, underground waters flow from that rock chain.

There is a spring in the beginning of Sarvanlar district (nothern direction) in Nakhchivan city. On that rock chain, to the south, there is Kabla Musa spring. After approximately 2,5 km Gizlar Bulagi spring is located. (Very pure and cool water leaks from rock stones between bold cliffs of that Gizlar Bulagi spring. Though many times buffalo carts, horse carts, old people, children fell because of carelessness from the top of those rocks, from very high distance on the rocks, they remained alive and even did not get any injuries. And the people made sure again that this part of rocks is bearer of holiness)

On that rock chain located in Saryanlar district the houses of Mirish-agma, Mirishli family situated. Afterwards grandiose mosque complex was constructed in the place of their house.

In former times a spring was flowing after Gizlar Bulagi on the distance of approximately 1 km, below the tomb of Momina Khatun.

Construction of the tomb in that place, on the height has three meanings. Firstly, the rock chain was sacred, the tomb was surrounded by light of sunrise and sunset, and flowing spring below that tomb (that place is also called Khan Diki (Kings Height)) protected it from underground water, from dampness.

But because of clogging of origin of the spring that flew below the tomb in former times, and collection of underground waters behind, the tomb started getting dampness, and the Northern side of the tomb become very damp.

---

After the tomb of Momina Khatun there is Prophet Noah's grave, Noah's tomb.

Prophet Noah's tomb is on height, on that rock chain. A spring flows below it as well. That flowing spring, location of Noah's tomb, the tomb of Momina Khatun on it, grandiose Mosque complex, Gizlar Bulagi and etc. have their meaning.

They did not choose their place, that place chose them. Sarvanlar district in the city is also situated on that rock chain.

The roads part from the place called four roads in the city – on the north: Shahbuz, on the west: Sharur, on the east: Ordubad, on the south: Nakhchivan city.

Since very ancient times Nakhchivan territory was well-known, remained in history as salt way and Silk way because of very elastic and transparent silk. It took place in historical stages with Prophet Noah as well.

Azerbaijan and Nakhchivan territory is the territory of Light. It is known from history that many commanders had made military marches to Azerbaijan, especially to Nakhchivan with their army. They wanted to capture Nakhchivan territory, the light territory. Nakhchivan people struggled with courage, every fighter was a commander.

But the ending of those marches was return of those commanders and armies from that territory after a while. Thereby that commander and army was defeated in this territory.

Because Azerbaijan territory initially has had its Light Master, and it is impossible to own that Absolute Light Master.

---

## **“Pyramid” – its Meaning and Essence...**

Direction of Sphinx in Egypt is eastward!

Sphinx has meaning of “welcoming the Light of the Rising Sun”!

Its meaning, its eastward direction, its orientation towards Light, Sunrise has great value!

And the essence, meaning of the name of Sphinx is “My Father Ra”!

That is, My Father Ra is Light!

But direct and reverse reading of the name of “Sphinx” confirm and supplement each other!

Just like direct and reverse reading of the words “Ata” (Azeri word – “Father”) and “Ana” (Azeri word – “Mother”)!

Opening mysterious code of those Egypt Pyramids we face such succession!

They were called “Pyramid”!

Opening the secret of the word “Pyramid” it is read as following:

“Py” ([Pi]) – (was approved as unit of circle area 3,16), appointed area,

“Ra” – Rising to Light, Light Summit.

“Mi” – Every edge of the triangle type pyramid (that is, in music notes Mi is the third too, it is the third note, key).

“Da” – means belonging, characterizes “Pyramid” as Temple of Light!

---

If to reason more profoundly, “Ra” is expressed in the names of all Angels!

Just like, Az-Ra-el, Jab-Ra-il.

The Ko-Ra-n, “Ya-Ra-dan” (Azeri word – “Creator”) and etc.

“Ra” – in any case, Represents, Glorifies the Holy Light!

So, when essence is cleared up, meaning of the Notion becomes clearer!

### **Realize...**

There was such a Doctrine of Sufis, “Imagine, but do not Image!”.

That is:

How can you Image the thing that you cannot Imagine?

Realize!

How can you Interpret the thing that you cannot Realize?”

The Universe is a Mystery!

How can you Interpret the Universe, that Mystery, not Realizing the Universe?

How can you Explain God’s Sayings, “His” Mysteries not Realizing “Him”, the Absolute Creator?

### **Mass, Weight, Speeds**

At the present time the airplanes help people to move. But the airplanes do not fly just owing to their wings and trunk. The

---

airplanes are given movement speed according to power of their engine, and the laws of aerodynamics are taken into account.

When automobiles conform to the high speed they fly, i.e. leave below the earth surface and etc.

Does the Earth have weight? If there is mass, then there is weight too! But according to the rotation speed of the Earth around the Sun the unit weight of the Earth amounts to 16. A cosmonaut in spacecraft leaving the movement speed of the Earth planet gets to state of weightlessness. Why? Because, that spacecraft and a man in it weight 16, conforming to common speed between planets in the great universe.

As the movement speed of the planets within the universe is 16 (it is very high movement speed) the planets do not attract each other. The spacecraft and the cosmonaut do not disappear to anywhere chaotically as a result of attraction. As that spacecraft and the earth conform to the interplanetary speed the weight is not felt. Interplanetary speed is 16. The common movement speed of all planets in the universe is 32. 16, 32 are major figures in Universe account. In the nature, in vegetation, in human body 4, 16, 32 are ever present figures.

In woman's body 16 are active and 16 are passive. In man's body 32 are active.

Let's look at human's state of death, a death moment: At that moment (death) momentary loss (decrease) of 0.16g from human body is observed. The smoke (black) sinks on the earth surface angularly with 16 km radius, spreads, and resolves.

---

It is known from science that when human breathes with oxygen he extracts carbon from his lungs. When giving artificial respiration to a man, if we interfere in that man who is about to die with just extracted carbon instead of oxygen, we would not help, but give him death sentence. But when human extracts oxygen that he uses for breathing from his lungs, he surely extracts 16% of oxygen not turning it into carbon. If it was not like this, there would not be any sense of helping to a man whose breath stopped with artificial respiration. But a man who wants to help with artificial respiration can save life of man whose breath stopped blowing with pressure 16% of his own oxygen into his lungs, and applying mechanical force and etc.

Let's look at movement dynamics of the Earth around the Sun: the Earth (out of its core) unceasingly moves around the Sun along its trajectory. The rivers on the Earth flow in accordance with that movement speed. Because, they are in flow according to the movement speed of the Earth planet. If there was attraction, the rivers, the seas, the oceans would be in confusion among each other, their directions would be mixed. As there is not attraction and repulsion mechanism among masses within the universe there does not exist collection of the all planets from one area to another. There is not chaos, chaotic self-willed movements in the universe.

There is free fall. Free fall is under 16 angle in accordance with speed of the Earth planet.

---

## Why do Human and all Living Creatures “be Hungry” – what is the reason?...

Human, all Living creatures be hungry at some phase of day!  
If to think very deeply, seeking for reason of “Being hungry”  
we are facing strange facts!

We Azerbaijanians, Azeris using the word “Acmaq” (Azeri word – “being hungry”), express the anatomic-physiological state happening Inside Body just like itself, we call the process occurring Inside Stomach by its own name saying that its “Bitter Taste” (in Azeri: “**Acı** dad”) Increases!

Contents of Stomach have become Bitter, Amount of “Bitter” has become equal to Amount of “Sour”!

Then we say “**Acmışam**” (Azeri word – “I am hungry”), that is Amount of Bitter in our Body has increased, I am hungry! (Hungry person is Angry (in Azeri “**Ac**” – “**Acıqlı**”).

All vegetation on the Earth, as well as Trees are in need of Water, they lack Water!

Stone, Sand, Mountain, Hill, all Salts, all Mineral wealth are in Need too! They are also in Need of Relative Moisture, in Need of It!

Newborn baby in the World is given Milk beginning from first minutes!

And the Milk given to that Baby has to be Slightly Sweet (Sweetish a little)!

Because Mother’s Milk is Sweetish too!

That Milk Bears Amount of Sweet!

---

What happens in Anatomical-Physiological state of that Baby that we ought to give to that Baby Sweetish Milk in a Little Mixture?

A Baby being born in the World Utters Sound, Voices beginning from the first moments!

By that “Sound” he Declares his Anatomical-Physiological state!

We think that “He is crying because his nappy is wet, or because he is hungry!”.

But it is so Indeed!

If his nappy is Wet, his Stable Body Temperature changes, and he Cries, gives Voice!

If Amount of Bitter and Sourness within His Stomach increases (subconscious memory), to Regulate them, he is trying to Regulate those Tastes by a Bit “Amount of Sweet”!

At the Phase of being Hungry of all Living creatures, as if, Order of the all Body Interior is Disordered!

This Condition just Resembles the Universe!

It Resembles Encounter of the Light Being with Dark Being!

The Light Being is Creator, Regulator, and the Dark Being is Disordering, Disturbing, Upsetting Order of Light!

In the Dark, at Nights different Pains, Agonies, different Boredoms Start!

But in the Daytime Pains and Agonies Lessen!

Then Light Being Increases Amount of its Light Portion!

Amount of Light Itself, as if is Regulator of the Amount of “Sweet”!

---

When Amount of “Bitter” and “Sour” Increases within the Temples, they Lessen the Amount of Sweet and Salty!

We become “Hungry” just because of this Simple reason, just to Regulate Amount of that Bitter and Sour.

When we equalize and Regulate those Four Tastes within Stomach by means of Different Food types, with amount of Sweet and Salty within those foods, we do not want to Eat any more, we Stop!

Most times Human says that "Light came in my eyes!".

And, what is that Light Coming in eyes?

That pronounced “Light” is that Creator, Regulator which Unites beings with Sweet!

In Azerbaijani national song it is said that “Sweetheart is Sweet”!

Then, Human expresses Amount of Sweet regulation that has to be equal with that Sweetheart between two sweets of his Feeling and Memory!

It is interesting to know, what is that Sweet in that Sweetheart that makes him to consider his Sweetheart Sweet?

But, how does it happen that Motherland is Sweet, Child is Sweet, Sweetheart is Sweet, Life is Sweet, and where does this Sweet come?

But, why just Sweet?

As “Sweet” stays between Regulation, Equal Distribution of all Conditions, he – Human Says, Resembles Condition of Distribution of Sweet by Sweet!

Generally, all Creatures nourish by Food!

---

Eating the Body is obliged to keep in equal order Four Main Taste Components, i.e. Sour, Bitter, Sweet and Salty within the body, it tries to keep stable its being with this Conditions, in accordance with Importance of keeping in Order their Necessary condition!

Amount of Sour and Bitter increases in stomach making Human, Creature hungry!

At this moment bile starts to function!

The bile interferes within the stomach little by little with its Bitter!

That amount of Sour and Bitter, as if, starts to “call” amount of Salty and Sweet! For this reason we try to restore the order of Four Components!

For example, horses do not have bile!

In spite of this, internal walls and layers of the horse’s stomach producing amount of Bitter in its stomach little by little helps digestion!

Bitter itself is the main factor too!

The all medicinal preparations are bearers of Bitter, they are bitter!

Doctor treats patient with that amount of Bitter!

As Amount of Bitter grows, in alive organism the body as if starts Calling Amount of Sour, Sweet and Salty!

If on the Earth planet the all Creatures increase “Amount of Bitter” in themselves, in their actions, behaviors, relations, thoughts, beings, works, with their useless Wars, then Tragedies, Disasters, Destructions, all Diseases start on the Earth!

---

Then we ourselves call the Universe for help!

We wait for “Help” from the Universe again!

Poor Universe, during millions of years you are still Regulating and Trying to regulate the all Conditions!

The “Bitter” mentioned in the text is not compensated by any other auxiliary Bitter!

That is, that Amount of Bitter cannot be replaced by Bitter of Pepper, by Bitter of Cayenne, by any additional Bitter!

That Bitter is Biological bitter existing in bodies!

It is important carrier, component existing in being of bodies!

It is impossible to reduce to nothing, to utilize completely that Bitter, that Sore from bodies, from creatures by no ways!

That Taste Carriers, Bitter, Sour, Sweet, Salty are Absolute beings!

There are no Creature Beings without them, they do not even exist!

There are some examples about “Biologic Bitter”.

Lets’ see some examples about Biologic Beings.

When newborn baby is given other milk in addition to breast milk, if amount of Sweet in the milk given to that baby (some months old) is much, the baby does not drink the milk with that composition, the baby cries.

Or if milk given without addition of sweet powder in it, the baby cries again, he does not want to drink it!

He drinks the milk with mean sweet compound, and instantly falls asleep!

---

That is, as mean amount of Sweet in milk is very close to breast milk composition (subconscious memory), he drinks that composition easily!

If given milk is cold, he does not want to drink too, he cries!

If it is very hot, he does not drink again and cries.

If the temperature of milk is average, he drinks easily and falls asleep!

Interesting question appears!

How does that newborn baby being very infant identify that the milk given to him has different composition and temperature than of breast milk?

That newborn baby does not know even who he is!

How does he know that taste is different and temperature limit is different?

But, why all newborns, babies of some animals have to drink “milk” from the first moment of their life?

Generally, all milk compositions in the Earth belong to saturated solutions, distilled water, rain water (Ph- 5,5, unit)!

All milk compositions are carriers of Biologic Taste, are precise temperature Carrier among the all temperature limits!

Because of this simple reason newborn Baby, owing to memory that he brought, Identifies himself instantly these conditions, Four Taste carriers, that is, Bitter, Sour, Sweet and Salty among his body memory, and 36°C difference of his body temperature!

It is memory carrier ability of all living creatures!

Lets’ see one more example.

---

All people like flowers very much! They accept grassland, flower garden very close to them!

What happens in this situation?

Human, all Creatures looking at those Flowers, Vegetation, at Biological saturated, Color composition, Saturated Temperature limit of each plant, see that its being is in surrounding of them, as it is shared among his Memory, in Instant, the Flowers seem native to all People, to all Creatures!

As if they look at “Interval limit” of their being!

Why does Human die by Biologic condition?

We say that it is “Biologic” death!

When human in Natural state leaves this world for a moment, Four Taste condition stops acutely in a moment!

That is, Bitter, Sour, Sweet, Salty composition state ceases in a Moment, those Functions are stopped by the Universe!

Light-Particle Connection stops!

As soon as Light-Particle connection stops, Biologic State of Four Tastes stops for this reason!

So, all connections, Taste, Color, Temperature, Light Connections are stopped with this condition, with Power of Light!

We say that Human “Died”, but all cells in human body do not die completely during four days, they “die away” gradually.

Look, how important for being Four Biologic State Compounds, Being, Color, Temperature, Particle-Body!

How does human “grow old” seemingly?

In Human being the all anatomic organs supplement his Being!

---

Humans Inner world, his Memory, Reminiscences do not “grow old”.

It is not Stomach that changes Human’s appearance, but his gut system, “Large intestine”!

There are a lot of such comparative examples, but I do not want to take your time.

### **The Rule of Need**

If to look around attentively, to look at conditions, the all conditions are in connection with each other!

It is impossible to function on the earth without Quantum physics, Quantum mechanics!

Considering Quantum physics, quantum condition and Quantum’s conception, these are the “Rule of Need”, and Quantum is its internal state!

Just like all condition are in need of each other!

Looking at the hard cliff, marble, stone, metal, we see that each of them is foliated, laminar by structure and essence!

What is the reason?

Let us assume that it is the “Rule of Variety!”, but where did this Rule of Variety arose from?

Thus, Variety arose from the Rule of Need!

The all conditions are in need of each other!

Let us consider some examples.

All conditions, all creatures are in need of Light - Heat!

---

They are in need of primary grain, seed, granule, scintilla, particle falling on the soil!

They are in need of Particle, Primery Light!

All Beings created from particle are in need of environment!

Grain, seed are in need of environment, and Soil!

The Soil is in need of Water!

And wind, weather is in need of water too!

Water, Soil, Mountain, Ravine, Heights, Holes on the Earth are in need of the Earth core!

The Core is in need of Light!

Human, living creature is in need of the Sun, That Light!

They are in need of Light, Heat of the Sun!

Human is in need of the all states!

He is in need of sleeping, in need of food, in need of walking, in need of moving, in need of thinking, in need of love, affection, in need of attention, in need of caress, in need of pain, and painlessness, in need of Light, in need of learning and knowing and etc.

Human is in need of birth of living creature, in atmosphere of Mother being, Mother being is in need of Man being (marriage)!

And they are Responsible for Look, behavior, breath, action!

They have free, independent Ability for constructing, constituting, giving designs, thinking, saying, giving ideas!

All conditions, mechanisms, buildings, machines are in need of parts!

---

These conditions are in need of the Universe, all planets in the Universe, all Galaxies, all interminable, inexhaustible movements are in need of the Universe!

And the Universe is in need of the Prime, That Primary Light, Absolute Master of the Universe!

It is the “Rule of need” originated, started from prime, the Rule of Disinterestedness, Unmercenariness!

In mechanics of the Universe none of the Planets “Oblige” each other in common movement, or be “Mercenary”!

They do not say “I” to each other, do not apply Coercion, Force to each other!

One note:

We should not think that just we two became aware of what we are speaking about right now, and nobody else knew and heard our conversation!

This is wrong idea, in the meaning that the all Universe system is “Hearing and Listening” to our conversation just at this instant.

For this reason human, living creature cannot lose touch with the Universe!

Human is not free, independent creature, but is “Absolute” Creature!

In the meaning that it is a creature with irreproachable, perfect anatomic-biological being!

But in all conditions it is a creature that is in need of its surrounding!

---

He is in need of sleeping, food, heat, cold, in need of color, sound, touch, feeling (taction), caress, pain, longing, concern, hope!

At the same time he is in need of night, daytime, in need of the Universe, and finally, in need of its Creator!

His thoughts are with himself, are His!

Due to those thoughts, he seeks and finds, becomes interested, invents, builds and constructs, argues, sometimes feels pity, sometimes forgives, and sometimes does not even forgive, pretends and becomes self-satisfied and etc.

It is right assertion that human is both Needy and Absolute being!

He considers principal what and how he thinks!

Because human being is not a “Robot” and does not have buttons, so that they could push any his button from the Universe implying “do it”, and turn off his movements by means of any his button implying “do not do it!”.

But indications of wrong in our mistakes are revealed, and known!

Therefore, we bear responsibility for every our step, every look, every breath, every thought!

In this respect, it is right that human is Free and Absolute just in his Thoughts!

---

## **Buta-Eccentric**

Theory of Buta-Eccentric was brought on the Earth by Azeris from Azerbaijan, and in further periods “Inertia” and “Centrifugal force” were brought in the world of science, in the sphere of physics!

To be more exact, as Azeris in Azerbaijan (in Ur territory) precisely new the Mechanics of Structure of the Universe, Astronomy science, they could bring initial Oval (ellipsoid) Theory, and subsequently Buta-Eccentric Theory, and they could bring from them to the sphere of physics centrifugal force, inertia, physical bases and etc. scientific theories!

What was the reason of possession of such sciences by Azeris?

Who was the earliest teacher who gave to Azeris interest for sciences and the studies from Azerbaijan territory?

The main reason of acquisition of knowledge by Azeris was their interest to look, to divide into distances, to search, to know (but not “I already know”)!

(Azeris in Azerbaijan territory never say “I know”, they say “I want to know!”).

**They Separate from Each Other, Separate  
from Existence to Exist Again...**

All Creatures separate from each other!

---

They be created and separate,  
They create and separate,  
Separate with creation,  
Separate to create!  
And they separate from each other!  
But being separated they do not disappear!  
They do not move away from each other!  
Everything stays around its Prime!  
It cannot move away from “It”, does not be far from “It”!  
It does not be its repeat!  
Separated one becomes like itself, becomes Itself!  
There is nothing that does not separate?  
How it would not separate?  
Every separated one Itself becomes a Creator!  
Because, It does not disappear!  
They cannot disappear, as “It”, Prime Itself, being Eternal  
cannot Disappear!  
Created, Creating, Creation, going to be Created cannot  
Disappear from Absence, but can Exist from Existence!

### **The Constellations are Initial Calendars**

At the stages of history the Noah’s Deluge had happened.  
The people who escaped that historical deluge continued taking  
new beginner steps with great belief and faith.

---

The people of that period kept in their memory Noah's Deluge and their rescue from that storm, alongside with it, they saved in history that period by means of symbols on stones, rocks and inscriptions. Therewith, remembering that salvation period related with the Savior they constructed Sun temples, seeing flowing water, soil, rocks and mountains as their saviors, they appraised them as divinity.

In the following historical periods the people remembered start of arrival of human child in the world with water, and his return from this Earth world – with water ending.

Those rescued people taking for their saviors, merciful and kind the vault of heaven, the Sky, the Sun, looking at the Sky with hope, with belief, found out who was a Savior, Rescuer, Protector and who was Those who had been saved. That is, the Savior is Tengri, the Rescuer is Prophet Noah's Light, the Protector is the Light, surrounding stones, rocks, and the humans are those who were saved. It was again beginning and continuation of a great belief.

To return to great belief and to protect it was necessary for that period. Because falsification, bad relations between people on the Earth before the Storm was the end, conclusion of their harmful, fatal behaviour. In that period before and after the storm the people used to live in accordance with Vault of heaven, with symmetrical order of the stars moving on the sky scoping definite period of the life on the Earth, periods of sowing and reaping, irrigation, harvesting, calming the ground,

---

looking at symmetrical order of the sky objects, i.e. the stars behaved in accordance with the period.

As the stars on the vault of heaven always move not confusing their sequence, that symmetric collection of stars was accepted as a “constellation” – a peak, undisturbed consecutive movement and a mover.

Rescued people started constructing dwelling settlements at the stages after the water vanished. Alongside with it, at the following stages they started constructing temples, The Light temple, thanksgiving temple. Four elements, i.e. the element of four corners was saved in construction and architecture. Those three corners were for observing the Sun, and the fourth corner was known as the corner of call.

It indicates movement of the sun in the trajectory of sunrise and sunset. The fifth element in the center of the element of the Vault of heaven (then called the dome) within the temple (the dome which spreads the sound everywhere with equal sound frequency even if you whisper) was constructed with the meaning “The Master of the Universe hears you even if you whisper”.

The storm of the Noah’s period exists in history. On the eve of the Storm the people of that period was looking for the Sunlight amidst the thick black clouds. They were looking for sunlight on the sky hoping that if they saw the sun the black clouds would move away (afterwards the people started using the phrase “black clouds are flying over our heads”).

---

Those people who rescued from the storm got one belief and faith that “we rescued in water, from water with water”, and with this memory they made that even the memory (because there was not a calendar then).

But in which period that storm happened, and with which sign was that time saved in memory? Remembering the order of seeming stars at that period as “Water flow, Water time”, noting that constellation as “Water pouring, Water flow” time they gave name to the sky object on the sky at that time. But when did it happen? They remembered the storm on February 11-18 (February is the name given to months at the following stages), i.e. when Aquarius constellation covered the Caucasus territory. During January-February the “Aquarius” constellation is observed from the territory of the Caucasus. In Azerbaijan the days of the Aries constellation on March 18-21 are celebrated as a holiday, and this time is celebrated as the time of start of life on the Earth.

Though the historical storm happened at the period of February 11-18 long years ago, the people living in Azerbaijan and Nakhchivan carrying it from memory to memory during centuries remembered that period as Big Chilla (*period of forty cold days of winter from the beginning*) and Small Chilla (*period of the last twenty days of winter*), and celebrated as Khidir holiday; saved it in history as the period of salvation of people from water. Remembering Khidir as a holiday they fried seeds of grain-crops in “sajs” (*iron disk for baking*) celebrating with joy and happiness that old period when the water, coldness

---

started vanishing, when ground warmed, grain-crops began to sprout.

In different periods military invasions were made in Azerbaijan and Nakhchivan, and in historical stages there were efforts to alienate that historical stage and territory by different mythes, legends, narrations and tales, though Noah's grave and tomb in Azerbaijan, in Nakhchivan, and the Prophets in divine books informed the mankind about the deluge.

There are still met different fiction history, name and territory falsifications. But in historical stages, in ancient world history the personalities, saviors, the stage and territory of arrival of divine books on the Earth are undeniable historical facts. Because more Supreme Master exists and will exist forever for delivery and establishment of those stages, those saviors, those divine books to mankind on the earth. He is Eternal, but humans are compelled to return.

So many human come on the earth, and so many human returned from the earth; did knowledge, the territories sent to the earth from the Heavens change? Can Master's absolute View, His absolute Establishment change? Human, land changes, but territory does not change.

---

### **Briefly about Author and His Books:**

Rzayev Vahid Zeynal (April 22, 1947 – September 21, 2018) was born in officer's family in Nakhchivan city.

In 1966 he finished the school No 1 in Nakchivan.

From 1972 to 1992 he worked as a standardizer engineer in Nakhcivan Republic Department of U.S.S.R. State Com-mittee of Standards.

On November 9, 1987 Rzayev Vahid Zeynal was awarded with Certificate of Honor for “Efficient and Long-term Labor Activity” by U.S.S.R. State Committee of Standards.

His works published after publication of the BOOK “CREATION” (May, 1999) containing the GREAT CREA-TOR’S SAYINGS (in azerbaijani cyrillic alphabet):

1. “The Talk about Creation” (I-II-III Parts; – jointly with Fikrat Rzayev – 1999-2000 - azerbaijani cyrillic alphabet)
2. “We Hope on You” (2000 – azerbaijani cyrillic alpha-bet)
3. “Our Creation is from Universes” (2003 – azerbaijani latin alphabet)
4. “We Started Existence from Existent” (2015 – azerbaijani latin alphabet)
5. “LIGHT, PARTICLE (was published in 2015 – 2018 in e-format on [www.aqra.az](http://www.aqra.az) on basis of the materials published in Fb - azerbaijani latin alphabet).
